Users may apply the information as they wish, provided that they acknowledge Stats SA as the source of the basic data wherever they process, apply, utilise, publish or distribute the data; and also that they specify that the relevant application and analysis (where applicable) result from their own processing of the data.

Stats SA publishes approximately 300 different statistical releases each year. It is not economically viable to produce them in more than one of South Africa's eleven official languages. Since the releases are used extensively, not only locally but also internationally, Stats SA releases are published in English only.

This publication is available on the Internet at www.statssa.gov.za.

A CD containing this document plus confidentialised digital data relating to this study, *Mortality and causes of death: Unit records 1997–2002*, is also available.

Stats SA products

A complete set of Stats SA publications is available at the Stats SA Library and the following libraries:

National Library of South Africa, Pretoria Division
National Library of South Africa, Cape Town Division
Natal Society Library, Pietermaritzburg
Library of Parliament, Cape Town
Bloemfontein Public Library

Preface

This statistical release presents the results on mortality and causes of death based on the analysis of information contained on all death notification forms received from the Department of Home Affairs for the years 1997 to 2003. The last release from Statistics South Africa on this topic was based on a 12% sample of the forms received for the years 1997 to 2001.

Mortality data are provided in numbers and percentages for 1997 to 2002 and in percentages only for 2003, as fewer death notification forms have been processed for deaths in 2003 than the corresponding number of deaths recorded in the population register. Basic information on the causes of death for all seven years is presented in the appendices. The detailed analysis provided in the text pertains to data for years 1997, 1999 and 2001.

It should be noted that the present release employed stricter coding procedures than the previous release. Moreover, an automated procedure was used to determine the underlying cause of death, whereas for the release based on the 12% sample this step was carried out by health professionals.

Thanks are due to the national departments of Home Affairs, Health, and Communications for their cooperation in this study and to the Demographic Estimation and Analysis Subcommittee of the Statistics Council for their valuable comments and contributions.

Forthcoming

Statistics South Africa plans to produce a more in-depth analytical report, including a comparison between data captured from death notification forms with death data recorded in the population register and data collected in the last two population censuses (1996 and 2001).

1. Introduction

1.1 Background

The systematic collection of data on mortality in South Africa is a recent phenomenon. It is widely acknowledged that the vital registration system for Africans was virtually non-existent under the apartheid government (e.g. Botha & Bradshaw, 1985). The government of post-apartheid South Africa recognised the importance of mortality and causes of death statistics and prioritised the collection of reliable mortality data. Various initiatives aimed at improving the quality of data have resulted in a dramatic improvement of the death registration system in the country over the last decade.

Accurate mortality statistics are needed for policy formulation, planning, monitoring and implementation of health programmes aimed at improving the health status of the population, particularly increasing life expectancy. The level of mortality is one of the indicators of the level of human development, hence its inclusion in the construction of human development indices and in the multi-dimensional approach to poverty.

Several studies have reported on mortality and the causes of death in South Africa (e.g. Dorrington et al., 2001; Dorrington et al., 2004). Statistics South Africa has the legal mandate to publish vital statistics based on deaths reported to the Department of Home Affairs. In 2001, Stats SA published the *Advance release of recorded causes of death, 1997–2000*, based on information from the population register, to meet the growing need for up-to-date information on mortality.

In 2002, Stats SA accelerated the processing of death notification forms (DNFs) for the period 1997 to 2001 and published a statistical release entitled *Causes of death in South Africa 1997–2001: Advance release of recorded causes of death*, based on a 12% sample of forms. This report highlighted a fast-changing profile of mortality in the country.

From early 2003, Statistics South Africa continued addressing the seven-year backlog in the compilation of statistics from DNFs. This endeavour has culminated in this release based on all the DNFs received from the Department of Home Affairs for the seven years 1997 to 2003.

It is envisaged that this release will become part of a regular series by Stats SA on mortality and causes of death in South Africa. Annual releases are planned, covering registered deaths per calendar year.

Several technical terms are used in this release. The definitions of these terms are provided in Appendix A.

1.2 Aims and objectives of this statistical release

The aims of this release are the following:

- to outline emerging trends, differentials and patterns of mortality by selected demographic and geographic characteristics for the period 1997-2003, as portrayed through death notification forms;
- to present statistics on the causes of death, using the underlying cause of death derived through the use of an automated method applied to the causes of death reported in death notifications. The focus is on the *underlying* causes of death, as this information is what is used for public health interventions; and
- to provide contextual information on the data and methods used to support further specialist analysis of the data available through death notification forms.

1.3 Scope and limitations of the release

Despite improved death registration, particularly the introduction of a new death notification form in 1998, the quality of the information collected and the overall coverage pose some challenges to the accuracy and comprehensiveness of the statistics they provide.

Factors limiting the accuracy and completeness of data obtained from the death notification forms are:

- The data from death notification forms is subject to content errors and omissions. Even though provision is made on the death notification form to record marital status, education, occupation, and the industrial sector in which the person worked, these variables have not been analysed in this release, due to lack of completeness. Location could be captured at the level of province only.
- Another limitation of the data used in this study is the probable under-registration of deaths, particularly in rural areas and of children. This leads to lower estimates of the total number of deaths that have occurred in the country and may lead to an under-estimation of some causes of death. It is not possible to calculate mortality rates using these data without first adjusting for the incompleteness of reporting. Deriving estimates of completeness of death registration is a complex issue and is not part of this release.
- The causes of death may also be misreported on the form. This happens when an incorrect cause of death is given or when the cause of death is not detailed. The quality of the reported information is determined largely by the diligence and integrity of the certifying official – physician, professional nurse or, in some rural areas, traditional headman. For example, the certifying officials sometimes write ‘natural causes’ instead of stating the actual cause.

Assessing the quality of the information reported is beyond the scope of this release, and no adjustments were made for misclassification of underlying causes of death due to inadequacies of certification.

This release covers mortality and causes of death broadly, and hence does not focus specifically on HIV and AIDS. It does, however, provide indirect evidence that HIV may be contributing to the increase in the level of mortality for prime-aged adults, given the increasing number of deaths due to associated diseases. The data captured through this exercise can contribute to detailed studies in which the incidence of deaths due to AIDS-related conditions is estimated (see, for example, Groenewald et al, 2005).

The change in methodology from the previous release (Stats SA, 2002) limits direct comparability. This is discussed in more detail in section 2.2 (p.7).

As noted elsewhere, a new death notification form was introduced in 1998. This may impact on the comparability of data captured in 1997 and earlier, with later mortality data.

In order to release information without further delays, three years (1997, 1999 and 2001) were selected for detailed analysis of the causes of death, although some tabulated data of the causes of death for all seven years are provided in appendices.

1.4 Organisation and presentation of this release

The remainder of this release is arranged as follows.

Section 2 describes the data compiled and methods used in preparing this release. Issues related to the completeness of the register and other aspects of data quality are discussed. The section also provides an overview of the data processing, and the methods used to determine the underlying causes of death.

Section 3 reports on the overall levels, patterns and trends of mortality. Specific emphasis is placed on age, sex, and geographic differences in these levels and patterns.

Section 4 provides information on the causes of death. A distinction is made between the reported causes of death, which may be multiple, and the derived underlying causes. The analysis distinguishes between natural and non-natural causes of death and then focuses on the leading underlying causes of death in each category.

Concluding remarks are presented in Section 5.

2. Data and methods

2.1 Data

Data source

This release is based exclusively on information recorded on the death notification forms received from the Department of Home Affairs (DHA), for the period 1997 to 2003. In 1998, a new form (Form BI-1663) was introduced. This form replaced the BI-7 and BI-12 forms that were previously used. An example of the new death notification form (Form BI-1663) is shown in Appendix B.

A total of 3 295 235 death notification forms were received from the DHA, organised by year of registration of death. Duplicates and forms for deaths which occurred before 1997 were removed, as were stillbirths, and cases which had an unspecified status (whether individual death or stillbirths). Even though stillbirths are recorded on DNFs, they fall outside the official definition of death. This resulted in a total of 2 877 654 valid forms for deaths which occurred during the reference period (1997-2003).

Table 2.1: Processing of death notification forms received from the Department of Home Affairs

Forms received from DHA	Duplicates identified through sorting	Duplicates identified post-capture	Deaths prior to 1997	Stillbirths	Unspecified as to death or stillbirth	Final number of valid cases of death for the study
3 295 235	297 134	46 217	960	63 185	85	2 887 654

The forms established as valid for use in the study were sorted into year of death for analysis. The numbers of valid forms for each of the seven years can be seen in Table 2.2. It should also be noted that these numbers are not identical to the number of deaths on the population register for the same period (also shown in the table). For most years there were more forms than deaths recorded in the population register. This is due in part to the fact that people without ID numbers are not included in the population register, and therefore their deaths are not recorded in the register.

However, in the case of 2003, fewer death notification forms had been received than the number of deaths recorded in the population register. According to the DHA there are often delays in sending death notification forms from the provinces to head office. It is for this reason that it is assumed that the 2003 data in this release are incomplete.

Table 2.2: Number of deaths for each year of death according to the population register and according to the processed forms: 1997-2003

No. of deaths according to	1997	1998	1999	2000	2001	2002	2003	Total
Population register	250 745	299 737	327 826	366 121	407 675	441 731	484 332	2 588 167
Valid forms received	318 287	367 689	381 902	413 969	451 936	499 268	454 603	2 887 654

Completeness of information

The registration of deaths has improved significantly over the last decade as a direct result of efforts to improve the vital registration system. Estimates of the completeness of adult death registration suggest that the completeness of the death register increased to about 90% for adult deaths by 2000 (Dorrington et al., 2001; Timaeus et al., 2002). However, the registration of childhood deaths (persons younger than 15 years) appears to be less complete than for adults. Using a technique developed by Brass (1975) to estimate the completeness of death registration using data on deaths and population by age, this release estimates that the completeness of adult death registration for 2002 was approximately 90%.

Population group was not recorded for a relatively large percentage of deaths. Approximately one-third of the death notification forms did not contain information on the population group of the deceased. However, the new death notification form introduced during 1998 made better provision for capturing population group, and from 1999 onwards this information was recorded on approximately three-quarters of all forms.

2.2 Methods

Overview of data capturing

The death notification forms (DNFs) were sorted by year, month, day and finally by surname of the deceased in alphabetical order. The main purpose was to identify and remove duplicates (see Table 2.1). At this stage 297 000 duplicate forms were identified. Forms corresponding to deaths prior to 1997 were also excluded from further processing for the compilation of this release. During data processing, unique identifiers (serial numbers) were developed for each form for the purpose of tracking them through the capturing and processing phases. The coding of causes of death followed a two-step process, with the checking of assigned codes by a more experienced coder. The coding method is detailed in the following section. After the data were captured, a verification process was carried out to ensure that all the DNFs which had been removed as duplicates during sorting were genuine duplicates, and to identify any that were mistakenly taken out as duplicates. Quality assurance of captured data was undertaken, comparing captured data with original forms, and data were recaptured where accuracy targets were not met.

Classification of the causes of death

The causes of death data presented in this release were coded using procedures described in the Stats SA manual *Guidelines for coders using ICD-10*.¹ The ICD-10 coding provides the basic guidance used in virtually all countries to code and classify causes of death data. It provides information on coding in terms of disease, injury and poisoning categories. It also provides the rules for selecting the underlying cause of death from the several diagnoses that may be reported on the death certificate, as well as definitions, tabulation lists, guidelines for the death notification form, and regulations on the use of the classification. The ICD-10 contains approximately 8000 categories of causes of death. The classification has been constructed for convenience and its usage is not mandatory. However, the ICD-10 has been adopted by member states. The National Health Information System of South Africa has adopted it as its standard.

¹ ICD-10 is the tenth revision of the International Classification of Diseases developed by the World Health Organisation (WHO), which is followed worldwide in order to have a uniform way of classifying morbidity as well as causes of death.

Mortality statistics released in this report are compiled in accordance with WHO regulations that specify that member states classify and code causes of death in accordance with the current revision of the ICD-10. The approach followed in this release is therefore, consistent with international best practice. However, some researchers, especially those analysing causes of death over a long period spanning several revisions of the ICD codes, have re-classified individual causes of death into what they consider to be appropriate groups. In some instances the main purpose of the re-grouping was to remove the effect of different versions of the ICD coding system. For example, in ICD-9, respiratory failure was grouped under the chapter on 'Symptoms, signs and ill-defined conditions', while in ICD-10, respiratory failure was placed in the chapter on 'Diseases of the respiratory system'.

The ICD-10 methodology also allows for the extension of classifications and codes. Many countries have developed unique codes and categories to reflect specific public health concerns. For example, since 2001, the US has introduced special codes for death due to terrorism. In South Africa, unique codes (Y67, Y68, Y37, Y39 and Y38) have been introduced for causes of death related to herbal poisoning, enemas by traditional doctors, mine accidents, accidents in sports, and circumcision.

For this project, an ICD-10 code was assigned by a coder for each cause of death recorded on the death notification form, and the allocated codes were then checked by a more experienced coder.

Automated generation of the underlying causes of death

More medical information may be reported on the death notification form than is directly reflected in the underlying cause of death. This information is referred to as multiple causes of death. When multiple causes are entered on the form, the underlying cause is determined by:

- the sequence of the conditions listed on the form, or
- the provisions of the ICD-10 and associated rules and modifications.

Once the causes of death given on the death notification forms had been coded as described above, the underlying causes of death were then derived automatically using a software programme called Automated Classification of Medical Entities (ACME 2004.02) developed by the United States National Center for Health Statistics (NCHS). The ACME program applies World Health Organization rules on the selection of underlying causes of death. The ACME program is used as the international standard in the automated coding of causes of death.

For more information on the ACME program and an evaluation of the coding quality, the reader is referred to the following websites: www.cdc.gov/nchs/ www.who.int/whosis/icd10/ www.who.int/whosis/icd10/report96 www.who.int/entity/classifications/network/en/

The Stats SA coding manual prescribes the use of three character codes while the ACME program requires four character codes in deriving the underlying cause of death. A conversion program was therefore applied to the codes for the ACME system to recognise the data as valid input. In most of the cases, the fourth character was '9' or '8', indicating that the detail of the coded disease was not specified.

While the automatic system did not resolve all coded cases, it did so for the overwhelming majority of cases. The underlying causes of death were automatically derived for approximately 98% of the records. The underlying causes for the rest of the records were manually derived.

The preparation of the ACME 2001 input file involved the following:

- a) Conversion of the captured ICD-10 codes into the required ACME format;
- b) Comparison of coded value sets for the up to five causes of death (Cause A, B, C, D and other causes of death, with the associated injury when necessary) with the valid value sets in the ACME instruction manual, and editing where necessary.

ACME input data exclude stillborns. The ACME system provides an editing user interface for cases to be resolved manually. This was required for some of the causes of death that are considered by the system as rare causes, such as cholera.

Comparability with the previous study on causes of death based on sample data

A key issue concerns the comparability of the previous results obtained from the sample of death notification forms (DNFs) (Stats SA, 2002) and the results obtained from using the algorithm implemented through ACME. It is important to note that the use of this algorithm represents a major change in methodology on the part of Stats SA. The previous study employed trained nurses who used their expert knowledge in conjunction with ICD-10 rules to choose the likely underlying cause of death out of at most five causes.

Regarding changes in the coding, subsequent to the previous release, a decision on how to code “*immunosuppression*” was agreed to.²

Appendix C provides information on comparisons between the underlying causes of death determined in the current exercise and the 12% sample.

Ranking the underlying causes of death

Ranking the underlying causes of death is useful for illustrating the relative burden of cause-specific mortality. The ranking simply denotes the frequency of causes of death among those causes eligible to be ranked and does not reflect the causes of death in terms of their importance from a public health point of view. As non-natural causes form such a high proportion in South Africa, natural and non-natural causes have been ranked separately.

In ranking natural underlying causes of death, *symptoms, signs and abnormal clinical findings not elsewhere classified* (R00-R99) are excluded. This group includes all ill-defined conditions regarding cases for which no diagnosis classifiable elsewhere is recorded. Table 2.3 shows the number of deaths that fell in these categories and were therefore excluded.

² In November 2003, Stats SA, the South African Medical Association, the Cancer Association of South Africa, the Medical Research Council and the National Department of Health held a workshop where certain decisions were taken regarding coding problems, including the coding of immunosuppression as immunodeficiency. In terms of the Stats SA coding procedures and guidelines, immunosuppression was not coded as HIV, but as immunodeficiency, which has a separate ICD-10 code. There is no code for immunosuppression in the ICD-10 manuals. However certifying officials sometimes reported the underlying cause of death as ‘acquired immune suppression’. There is no code in the ICD-10 for ‘acquired immune suppression’. In terms of the Stats SA coding procedures, this term was interpreted as HIV disease and given an HIV code (group B20-B24). If HIV was written on the form this was also coded in the HIV group, as required by the ICD-10. This approach followed the principle of ‘what you see is what you code’.

Most of these cases were *ill-defined and unknown causes of mortality*, a group which includes causes such as *sudden infant death syndrome, other sudden death with causes unknown, unattended death* and any other ill-defined and unspecified causes of mortality. Although in some cases these causes would have been among the ten leading underlying causes, they are excluded from the ranking, as the information cannot be effectively utilised for public health policy planning purposes. Effectively this means that 42 963, 47 197 and 56 224 deaths were excluded from the total number of deaths for 1997, 1999 and 2001 respectively, in terms of identifying the leading underlying causes of death.

It is important to note that the method of ranking underlying causes used in this release is not identical to the ranking according to the NCHS list, as its suitability has not been established for South African circumstances. The NCHS ranking list is a well-established list that has become standard for the United States of America and other countries. These ranking procedures have been promulgated in educational seminars in the Caribbean, Middle East and Eastern Europe. Currently the World Health Organization (WHO) has developed a ranking list for international application. Debates are ongoing as to the suitability of the list as an international standard. A comparison between the ten leading causes of death in South Africa for the years 1997, 1999 and 2001 according to the two methods is provided in Appendix D.

Table 2.3: Number and percentage of deaths due to symptoms, signs and abnormal clinical findings, not elsewhere classified: 1997, 1999 and 2001

ICD-10 Chapter 18 causes	Number			Percentage		
	1997	1999	2001	1997	1999	2001
Symptoms and signs involving the circulatory and respiratory systems (R00 - R09)	350	795	875	0,8	1,7	1,6
Symptoms and signs involving digestive system and abdomen (R10 - R19)	199	339	521	0,5	0,7	0,9
Symptoms and signs involving skin and subcutaneous tissue (R20 - R23)	7	10	22	0,0	0,0	0,0
Symptoms and signs involving the nervous and musculoskeletal systems (R25 - R29)	6	23	16	0,0	0,0	0,0
Symptoms and signs involving the urinary system (R30 - R39)	10	17	11	0,0	0,0	0,0
Symptoms and signs involving cognition, perception, emotional state and behaviour (R40 - R46)	26	49	42	0,1	0,1	0,1
Symptoms and signs involving speech and voice (R47 - R49)	0	2	4	0,0	0,0	0,0
General symptoms and signs (R50 - R69)	4 861	5 757	5 909	11,3	12,2	10,5
Abnormal findings on examination of blood without diagnosis (R70 - R79)	17	47	38	0,0	0,1	0,1
Abnormal findings on examination of urine without diagnosis (R80 - R82)	0	0	0	0,0	0,0	0,0
Abnormal findings on examination of other fluids, substances and tissues without diagnosis (R83 - R89)	9	12	13	0,0	0,0	0,0
Abnormal findings on diagnostic imaging in function studies without diagnosis (R90 - R94)	9	21	16	0,0	0,0	0,0
Ill-defined and unknown causes of mortality (R95 - R99)	37 469	40 125	48 757	87,2	85,0	86,7
Subtotal	42 963	47 197	56 224	100,0	100,0	100,0
Symptoms, signs and abnormal clinical findings not elsewhere classified	42 963	47 197	56 224	13,5	12,4	12,4
Other causes	275 324	334 705	395 712	86,5	87,6	87,6
All causes	318 287	381 902	451 936	100,0	100,0	100,0

3. Overall levels, patterns and differentials of mortality

3.1 The overall pattern of deaths

The results presented in this part of the release are based on the information on individual deaths which occurred between 1997 and 2002. As stated earlier, the processing of the DNFs for 2003 is not yet complete, so only percentages are given for that year.

Table 3.1: Overall number of deaths for each year of death by broad age group, 1997-2002

Year of death	0-14 years	15+ years	Unspecified age	Total
1997	40 495	272 221	5 571	318 287
1998	47 407	315 187	5 095	367 689
1999	46 534	332 649	2 719	381 902
2000	47 419	364 357	2 193	413 969
2001	48 954	401 095	1 887	451 936
2002	56 250	441 029	1 989	499 268

The results shown in Table 3.1 and Figure 3.1 indicate that the number of deaths increased by 57% from 318 287 in 1997 to 499 268 in 2002. Part of this increase may be attributed to population growth (there was approximately 10% growth in population over this period) and improvements in death registration.

Figure 3.1: Distribution of deaths by year of death, 1997-2002 (thousands)

Note: The completeness of the death register has increased each year so that 2002 is more complete than 1997.

The next figure, Figure 3.2, shows the number of adult deaths (persons aged 15 years and above). The figures indicate that the number of deaths increased by 62% from 272 221 in 1997 to 441 029 in 2002.

Figure 3.2: Distribution of adult deaths by year of death, 1997-2002 (thousands)

Note: The completeness of the death register has increased each year so that 2002 is more complete than 1997.

3.2 Population group differences in mortality

Under apartheid South Africa people were classified into four official population groups: whites, Asians, coloureds and Africans. The Population Registration Act, in terms of which South Africans were classified according to population group, was repealed in 1991. The term 'population group' as used in this release therefore refers to population group as identified by the certifying medical practitioner or other official.

The reader is reminded that numerous forms did not record population group, particularly for deaths reported in 1997 and 1998 using the old form. The distribution of deaths by population group for each year up to 2002 is presented in Table 3.2, which also gives the percentage of deaths with unspecified population group. As expected, of those deaths with specified population group the African population group recorded the most deaths each year. This profile reflects the composition of the population in the country.

Table 3.2: Distribution of deaths by population group for each year of death, 1997-2002

Year of death	African	Coloured	Indian/Asian	White	Other, unspecified or unknown		Total
	No.	No.	No.	No.	No.	%	
1997	47 524	1 697	875	4 144	264 047	83,0	318 287
1998	119 786	8 981	2 520	14 572	221 830	60,3	367 689
1999	215 699	22 987	4 773	32 823	105 620	27,7	381 902
2000	254 613	23 646	6 593	34 077	95 040	23,3	413 969
2001	278 178	24 125	6 831	35 343	107 459	23,8	451 936
2002	308 946	24 269	6 832	35 200	124 021	24,8	499 268

3.3 Age and sex differences in mortality

Table 3.3 shows the number of deaths in five-year age categories for the years 1997-2002, and Table 3.4 the same information in percentages for 1997-2003. Figures 3.4 and 3.5 present these data graphically. It can be seen that there was an increase in the proportion of deaths among persons aged 20 to 44 and children younger than 4 years. The figures also show a continuing shift in the age distribution of mortality, with relatively large increases in the number of deaths among young adults.

Table 3.3: Total number of deaths by age and year of death, 1997-2002

Age	1997	1998	1999	2000	2001	2002
0-4	34 779	41 171	40 139	40 768	41 920	48 572
5-9	2 970	3 245	3 422	3 604	3 831	4 339

Figure 3.4: Percentage distribution of deaths by age and year of death, 1997-2002

The next four sets of tables and figures show the number and percentages of deaths for males and females separately. As before, numbers are given up to 2002 only, and percentages up to 2003. The figures suggest that there has been a significant increase in the number of deaths amongst men aged 30-44 and amongst women in reproductive ages.

Table 3.5: Number of male deaths by age and year of death, 1997-2002

Age	1997	1998	1999	2000	2001	2002
0-4	18 287	21 497	20 706	21 158	21 800	25 341

90+	43	42	41	39	42	43	42
Unspecified	132	135	134	134	134	146	156
Total	127	123	119	112	110	106	105

Over the period 1997 to 2002, 53% of all deaths were male. However, the proportion declined from about 56% in 1997 to about 51% in 2002.

Table 3.9 and Figure 3.9 show the age-specific sex ratios for deaths between 1997 and 2002. A low sex ratio (i.e. a sex ratio less than 100) means that the deaths were disproportionately female while a high sex ratio means that the deaths were disproportionately male.³ The overall sex ratio derived from the total number of deaths for the period 1997-2002 is 114 compared to a sex ratio of 91 in the 2001 population census. This sex ratio is substantially higher than the sex ratio of the general population. This may be a reflection of a higher risk of mortality for men than for women, or a disproportionately higher under-registration of female deaths.

The figures also suggest that the sex ratios of deaths for young adults (those aged 20-29) have decreased substantially over the period 1997-2003. The low sex ratios in these age groups, 72 for those aged 20-24 and 77 for those aged 25-29 in 2003, indicate that there were more female deaths than male deaths in that year. For earlier years (1997-1999), the sex ratios for these age groups were higher, indicating that there were more male deaths than female deaths. Although the general pattern shows a decline in the sex ratios during the period, the sex ratios for those aged below 15 and 40-64 have remained significantly above 100, which implies higher male mortality at these ages.

³ The sex ratio is expressed as the number of male deaths per 100 female deaths.

Figure 3.9: Sex ratios of deaths by age and year of death, 1997-2003

3.4 Distribution of deaths by province

Table 3.10 shows the number of deaths for the nine provinces⁴ for 1997 to 2002. Table 3.11 gives the percentages for 1997 to 2003. Figures 3.10 and 3.11 show the same information graphically. The data suggest that while all provinces have had an increase in the number of deaths over time, the increase has been more rapid in KwaZulu-Natal. This is also the province with the largest proportion of deaths in the country, followed by Gauteng.

Table 3.10: Number of deaths by province and year of death, 1997-2002

	1997	1998	1999	2000	2001	2002
Western Cape	33 292	36 347	38 088	38 540	41 042	43 667

Excluding deaths taking outside South Africa and unspecified

Figure 3.11: Percentage distribution of deaths by province and year of death, 1997-2003

The completeness of the death register varies by year and province of death. The death register is more complete for 2002 than for 1997.

4. Causes of death in South Africa 1997, 1999 and 2001

4.1 Introduction

This section of the release focuses on the causes of death for 1997, 1999 and 2001. These three years were selected to provide an indication of trends over the period. A breakdown of the causes of death recorded on the death notification forms is provided first, followed by an analysis of the derived underlying causes of death.

In terms of the underlying cause of death, a breakdown of deaths according to the 18 main (level one) groups of causes of death, and an age breakdown of the proportion of deaths due to natural and non-natural causes, are presented. Natural deaths are then analysed according to the leading broad groups of underlying causes, using ranking as described in Section 2, for the South African population as a whole, for females and males, for various age groups, and for provinces. The high proportion of forms on which population group is not specified militates against reliance on analysis in terms of population group. However results from those forms which did specify population group are presented in Appendix H.

Non-natural deaths are then treated as a separate group, in view of the concern in South Africa about levels of violence and deaths due to accidents. Non-natural deaths consist of all deaths that were not attributable, or may not have been attributable, to natural causes. In terms of the Inquest Act (Act 58 of 1959) these deaths are subject to medico-legal investigation, an autopsy must be conducted to try to establish the cause of death, and an inquest is compulsory. The results of the inquest are then sent to the Department of Home Affairs, which issues the final death certificate.

Lastly, comparison is made between the reported causes of natural deaths and the results in terms of the underlying causes.

4.2 Reported causes of death

The format of the DNF provides for the recording of more than one cause of death, that is, *multiple* causes of death may be reported. Multiple causes of death are defined as: *'All morbid conditions, diseases and injuries entered on the death certificate. These causes include those involved in the morbid train of events leading to the death which were classified as either the underlying causes, the intermediate cause, or any intervening cause and those conditions which contributed to death but were not related to the disease or condition causing death.'* Table 4.1 provides the number of causes of death (from one to five and more) associated with the deaths recorded for 1997, 1999 and 2001.

Table 4.1: Distribution of death notification forms by the number of causes entered on the form: 1997, 1999 and 2001

Number of reported causes of death	1997		1999		2001	
	No. of death notification forms	%	No. of death notification forms	%	No. of death notification forms	%
No cause given	9	0,0	5	0,0	12	0,0
1 cause	176 811	55,6	210 627	55,2	270 893	59,9
2 causes	89 633	28,2	111 589	29,2	122 176	27,0
3 causes	37 903	11,9	43 640	11,4	44 269	9,8
4 causes	10 772	3,4	12 865	3,4	11 921	2,6
5 or more causes	3 159	1,0	3 176	0,8	2 665	0,6
Total	318 287	100,0	381 902	100,0	451 936	100,0

It can be noted from the above table that more than half of the reported deaths in each of the three years under discussion were associated with one cause only.

We now look at the frequency with which individual causes were recorded on a form. Table 4.2 gives the number of associated deaths for the ten leading recorded natural causes of death. *Other forms of heart disease, tuberculosis, and influenza and pneumonia* were the three reported causes that were associated with the most deaths for the three years. However, it should be noted that the number of deaths which had *tuberculosis* or *influenza and pneumonia* as one of the reported causes increased substantially over the period.

Table 4.2: Number of associated deaths for the ten leading reported natural causes of death and for HIV as a reported cause: 1997, 1999 and 2001

Reported causes of death	1997	1999	2001
Other forms of heart disease (I30 - I52)	60 768	53 977	48 927
Tuberculosis (A15 - A19)	25 640	39 759	56 985
Influenza and pneumonia (J10 - J18)	24 698	39 069	55 115
Cerebrovascular diseases (I60 - I69)	24 039	28 218	31 104
Hypertensive diseases (I10 - I15)	19 786	24 911	27 622
General symptoms and signs (R50 - R69)	16 307	19 618	19 454
Respiratory and cardiovascular disorders specific to the perinatal period (P20 - P29)	15 449	16 483	17 191
Chronic lower respiratory diseases (J40 - J47)	15 330	18 242	20 136
Ischaemic heart diseases (I 20-I 25)	14 512	16 867	17 380
Diabetics mellitus (E10 - E14)	12 133	14 244	16 207
Human immunodeficiency virus (HIV) diseases (B20 - B24)*	6 602	10 331	9 479
Events of undetermined intent (Y10 - Y34)*	45 182	37 627	35 328

* HIV and non-natural causes (events of undetermined intent) have been added for comparison purposes

It should be noted that this table focuses on natural causes of death, and at the second level of classification (broad groups of causes). This is in order to facilitate comparison with the findings from the analysis of the derived underlying causes of death, which follows in section 4.5. The comparison between reported and underlying causes will be found in section 4.7.

4.3 Overview of the leading underlying causes of death

This subsection focuses on the eighteen main (level one) groups of underlying causes of death. Figure 4.1 shows the main groups of leading causes of death in 1997. The top four groups of causes accounted for just under two-thirds (62%) of all deaths in that year.

Figure 4.1: Main groups of causes of death: 1997

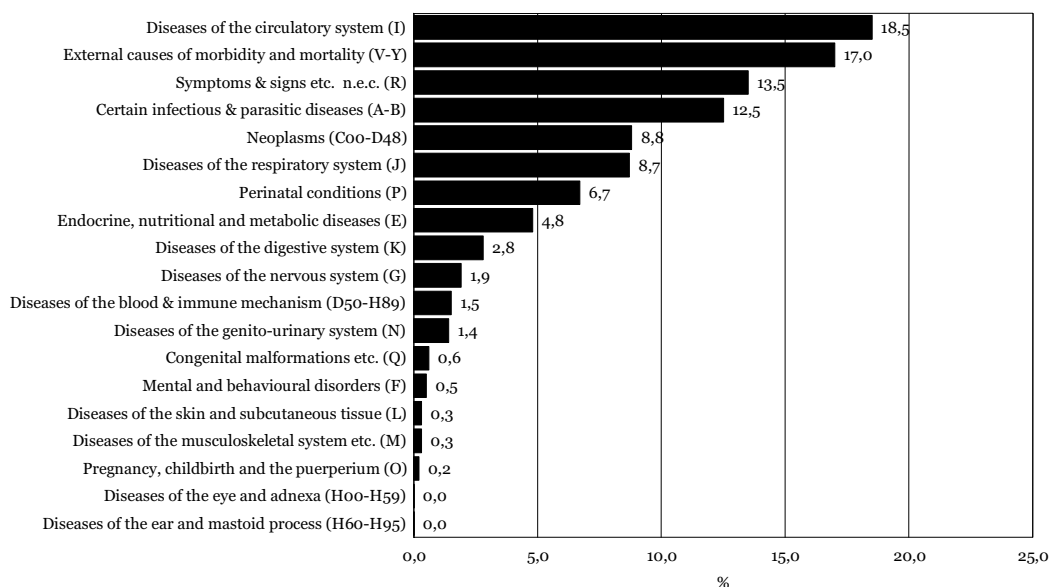

Figure 4.2: Main groups of causes of death: 1999

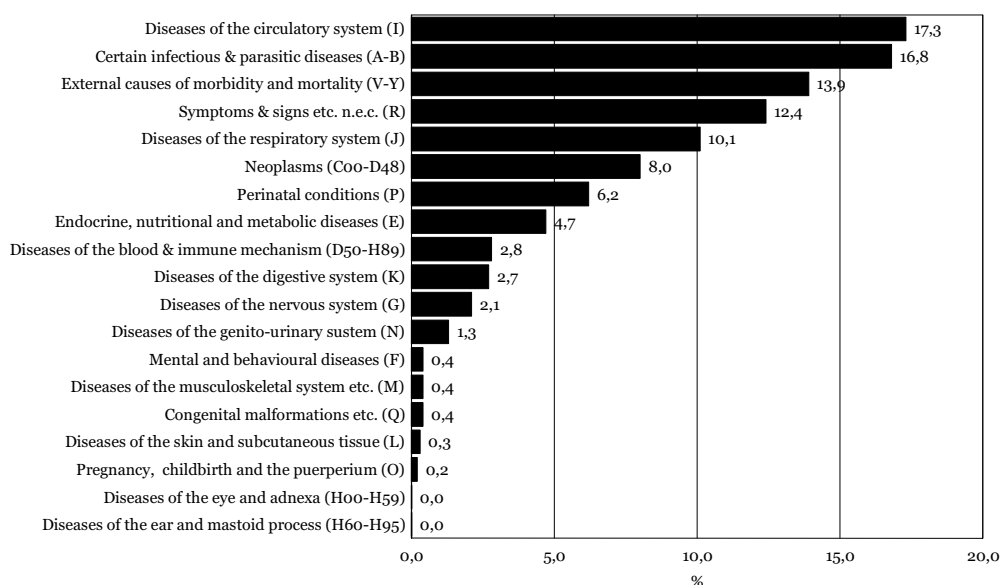

Figure 4.2, which shows the breakdown for 1999, indicates a change in the proportions of deaths due to three of the four leading main groups. The top five causes accounted for 71% of all deaths in that year. *Diseases of the circulatory system* decreased from 18,5% in 1997 to 17,3% in 1999, *symptoms and signs abnormal clinical and laboratory findings not elsewhere classified* decreased from 13,5% to 12,4%, and *external causes of morbidity and mortality* decreased from 17% to 13,9%, while *diseases of the respiratory system* increased from 8,7% to 10,1% during the above period. The proportion of deaths due to *certain infectious and parasitic diseases* increased from 12,5% in 1997 to 16,8% in 1999.

Figure 4.3: Main groups of causes of death: 2001

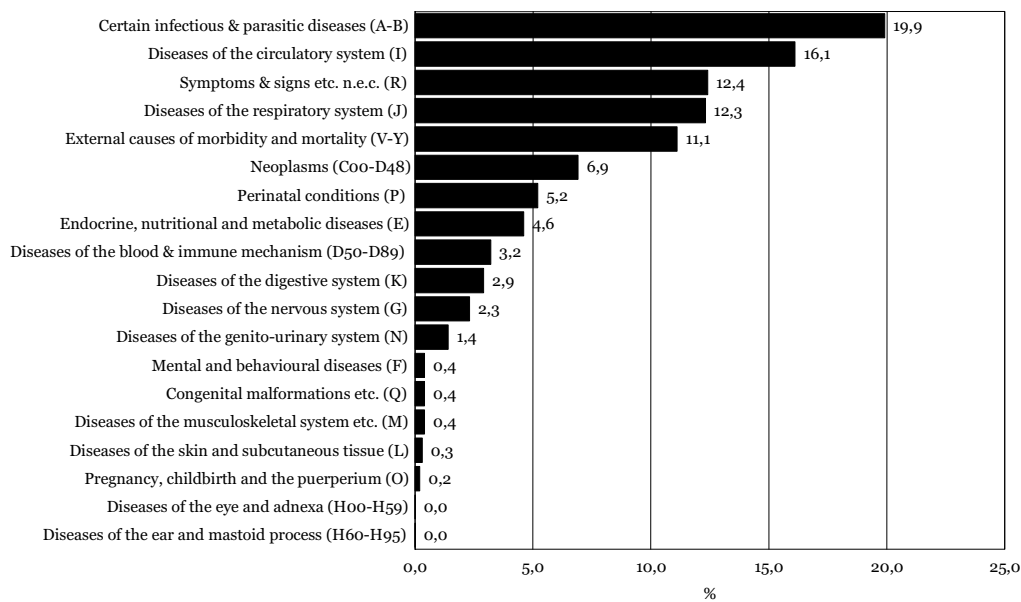

Figure 4.3 shows that the top five causes accounted for just under three-quarters (72%) of all deaths in 2001. A further increase in deaths due to *certain infectious and parasitic diseases* was observed, from 16,8% in 1999 to 19,9% in 2001, while *diseases of the respiratory system* increased from 10,1% in 1999 to 12,3% in 2001. The proportion of deaths due to *external causes of morbidity and mortality* decreased from 13,9% in 1999 to 11,1% in 2001, while that pertaining to *diseases of the circulatory system* decreased from 17,3% in 1999 to 16,1% in 2001.

4.4 Natural and non-natural causes of death

The next table shows the number and percentage of deaths due to natural and non-natural causes in each of the three years, while Figures 4.4 to 4.6 show the percentage distributions across age groups. Non-natural deaths constituted a substantial proportion in the 5-29 age groups, decreasing thereafter with age. However, the overall proportion of non-natural deaths decreased from 17,0% in 1997 to 11,1% in 2001.

Table 4.3: Natural and non-natural deaths: 1997, 1999 and 2001

Cause of death	1997		1999		2001	
	No.	%	No.	%	No.	%
Natural	264 285	83,0	328 671	86,1	401 812	88,9
Non-natural	54 002	17,0	53 231	13,9	50 124	11,1
Total	318 287	100,0	381 902	100,0	451 936	100,0

Deaths attributed to symptoms, signs and abnormal clinical and laboratory findings, not elsewhere classified, are included with natural causes.

Figure 4.4: Distribution of deaths due to natural and non-natural causes according to age group: 1997

Including in natural causes 42 972 cases with *symptoms, signs and abnormal clinical and laboratory findings, not elsewhere classified* as an underlying cause of death, and excluding 5571 cases with unspecified age

Figure 4.5: Distribution of deaths due to natural and non-natural causes according to age group: 1999

Including in natural causes 47 202 cases with symptoms, signs and abnormal clinical and laboratory findings, not elsewhere classified as an underlying cause of death, and excluding 2719 cases with unspecified age

Figure 4.6: Distribution of deaths due to natural and non-natural causes according to age group: 2001

Including in natural causes 56 253 cases with symptoms, signs and abnormal clinical and laboratory findings, not elsewhere classified as an underlying cause of death, and excluding 1887 cases with unspecified age

4.5 Natural causes of death

Ten leading underlying natural causes of death

We now turn to a detailed analysis of natural causes of death. The main groups of causes of death used in section 4.3 are likely to conceal crucial variations within groups and for various sections of the population. Hence, the analyses that follow are based on the next level of aggregation, referred to as broad groups of underlying causes.

Table 4.4 shows the ten leading underlying natural causes of death in 1997, 1999 and 2001. Complete rankings of all causes for the seven years are shown in Appendix E. In 1997, the ten leading causes collectively accounted for almost 40% of all deaths occurring in South Africa in that year. The top three causes, *tuberculosis*, *other forms of heart disease*, and *cerebrovascular diseases*, accounted for just under a fifth (19%) of all deaths in that year.

The top seven leading underlying natural causes of death remained unchanged for 1999 from 1997, although the ranking changed. The ten leading causes accounted for 42% of all deaths in 1999. The top three causes collectively accounted for just about a fifth (19%) of all deaths. It should however, be noted that *intestinal infectious diseases*, and *human immunodeficiency virus disease*, which were not among the ten leading causes of death in 1997, were among the ten leading causes in 1999. They ranked eighth and ninth respectively.

The top four leading underlying natural causes of death in 2001 remained the same as in 1997 and 1999, although the ranking changed. The ten leading causes accounted for 46% of all deaths in 2001. The top four causes accounted for just over a quarter (28%) of all deaths. Of the two new leading causes in 1999, *intestinal infectious diseases* had moved up the ranking, while *HIV diseases* fell off the list. *Tuberculosis*, which was the leading cause of death in 1997 and 1999, was again the top leading cause of death. *Influenza and pneumonia* came second, while *other forms of heart disease* dropped to third from second place. *Certain disorders involving the immune mechanism*, which was not among the ten leading causes in 1997 or 1999, became the ninth leading cause of death.

Table 4.4: The ten leading underlying natural causes of death: 1997, 1999 and 2001

	1997			1999			2001		
	Rank	No.	%	Rank	No.	%	Rank	No.	%
Tuberculosis (A15 - A19)	1	22 021	6,9	1	34 173	8,9	1	50 872	11,3
Other forms of heart disease (I30 - I52)	2	20 103	6,3	2	20 120	5,3	3	22 602	5,0
Cerebrovascular diseases (I60 - I69)	3	16 992	5,3	3	19 948	5,2	4	22 577	5,0
Influenza and pneumonia (J10 - J18)	4	11 503	3,6	4	19 135	5,0	2	31 495	7,0
Diabetes mellitus (E10 - E14)	5	10 828	3,4	6	12 540	3,3	7	14 557	3,2
Chronic lower respiratory diseases (J40 - J47)	6	10 747	3,4	5	12 573	3,3	6	14 681	3,2
Ischaemic heart diseases (I20 - I25)	7	9 794	3,1	7	11 426	3,0	8	11 777	2,6
Malignant neoplasms of the digestive organs (C15 - C26)	8	8 914	2,8
Hypertensive diseases (I10 - I15)	9	7 706	2,4	10	9 427	2,5	10	10 748	2,4
Resp. & cardio. disorders – perinatal (P20 - P29)	10	7 125	2,2
Intestinal infectious diseases (A00 - A09)	8	11 155	2,9	5	16 060	3,6
Human immunodeficiency virus [HIV] diseases (B20 - B24)	9	9 925	2,6
Certain disorders of the immune mechanism (D80 - D89)	9	11 670	2,6
Other causes		192 554	60,5		221 480	58,0		244 897	54,2
Total		318 287	100,0		381 902	100,0		451 936	100,0

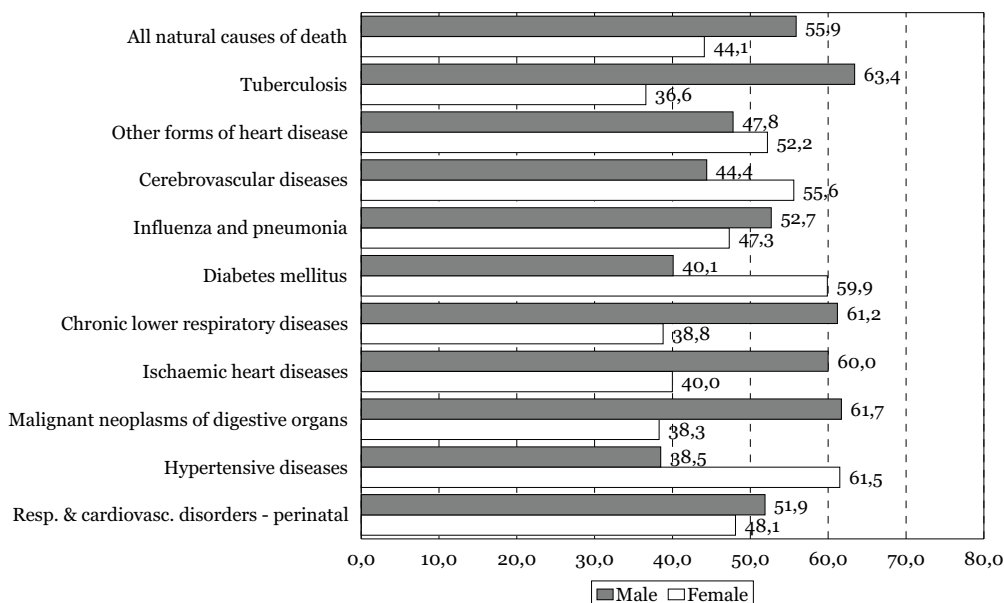

... Category not in top ten

It is important to note that there was a steady increase in the proportion of deaths due to *tuberculosis* from 6,9% in 1997, to 11,3% in 2001. The proportion of deaths due to *influenza and pneumonia* also increased from 3,6% in 1997 to 7,0% in 2001. On the other hand, the proportion of deaths due to *other forms of heart disease* decreased from 6,3% in 1997 to 5,0% in 2001.

In summary, the following broad groups – 1) *intestinal infectious diseases*, 2) *tuberculosis*, 3) *human immunodeficiency virus disease*, 4) *malignant neoplasms of digestive organs*, 5) *certain disorders involving the immune mechanism*, 6) *diabetes mellitus*, 7) *hypertensive diseases*, 8) *ischaemic heart diseases*, 9) *other forms of heart disease*, 10) *cerebrovascular diseases*, 11) *influenza and pneumonia*, 12) *chronic lower respiratory diseases*, and 13) *respiratory and cardiovascular disorders specific to the perinatal period* (listed here in no particular order) – were among the ten leading causes in at least one of the three years examined. More details of the specific diseases that fall into each category are presented in Appendix F.

Figures 4.7 to 4.9 below show the proportion of deaths attributed to males and females in each of the ten leading underlying natural causes of death for 1997, 1999 and 2001.

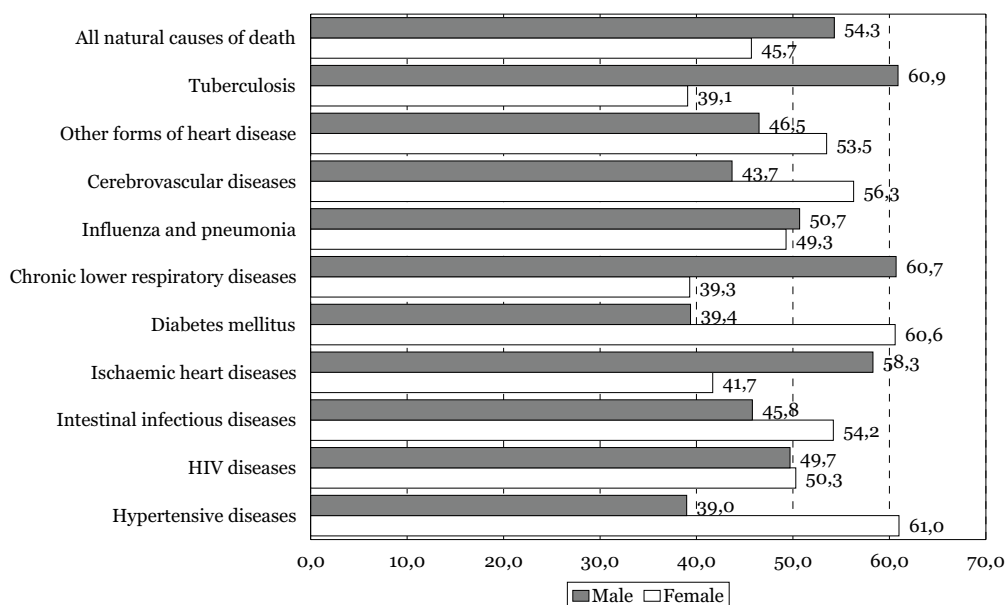

Figure 4.7: The proportion of deaths attributed to males and females in each of the ten leading underlying natural causes of death: 1997

Excluding 1036 cases with unspecified sex

The figures in Figure 4.7 show that in 1997 *tuberculosis* was the cause of death with the greatest difference between the percentage of males (63%) and females (37%). Males also made up the larger proportion of those for whom one of the following was the underlying cause of death: *chronic lower respiratory diseases*, *influenza and pneumonia*, *ischaemic heart disease*, *malignant neoplasms of the digestive organs*, and *respiratory and cardiovascular disorders specific to the perinatal period*, whereas females made up the larger proportion in the case of *hypertensive diseases*, *diabetes mellitus*, *cerebrovascular diseases* and *other forms of heart disease*.

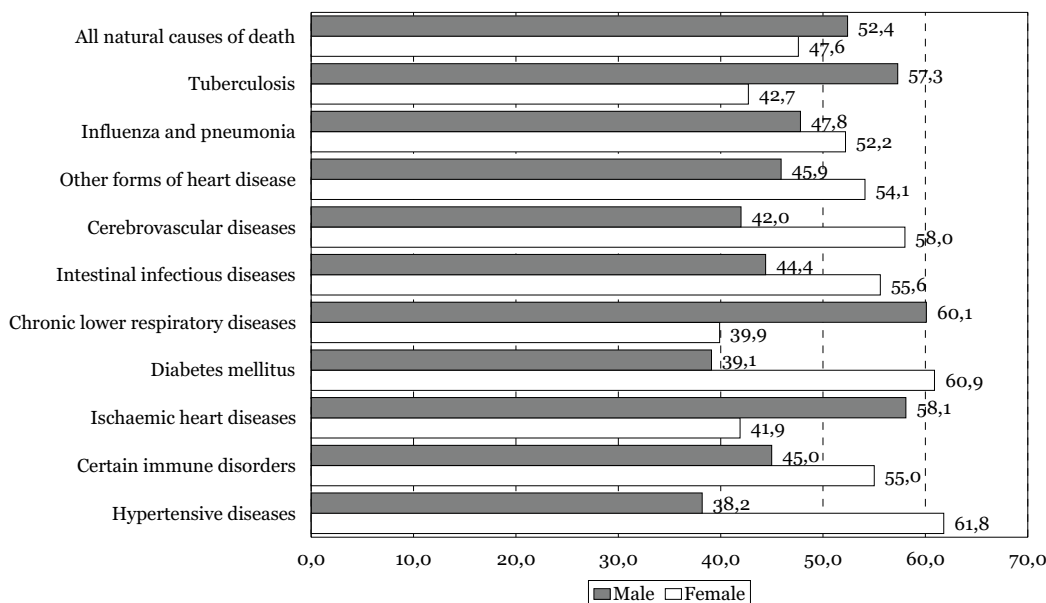

Figure 4.8: The proportion of deaths attributed to males and females in each of the ten leading underlying natural causes of death: 1999

Excluding 2072 cases with unspecified sex

The figures presented in Figure 4.8 show that in 1999 *tuberculosis* was again the leading cause of death. Males constituted the highest proportion (61%) compared to 39% as far as females were concerned. Males also constituted a higher proportion in the case of *chronic lower respiratory diseases*, *influenza and pneumonia* and *ischaemic heart disease*. Females constituted a higher proportion in the case of *intestinal infectious diseases*, *diabetes mellitus*, *cerebrovascular disease*, *hypertensive diseases* and *other forms of heart disease*.

Figure 4.9: The proportion attributed to males and females in each of the ten leading underlying natural causes of death: 2001

Excluding 1597 cases with unspecified sex

In 2001 the greatest difference between the sexes is seen in *hypertensive diseases* (females 61,8%, males 38,2%) and *diabetes mellitus* (females 60,9%, males 39,1%), while *chronic lower respiratory diseases* was the cause of death where males exceeded females by the greatest percentage (males 60,1%, females 39,9%). Males also made up the highest proportion in the case of *tuberculosis* and *ischaemic heart disease*, whereas females made up the largest proportion in the case of *cerebrovascular diseases*, *other forms of heart disease*, *certain disorders involving the immune mechanism*, *intestinal infectious diseases*, and *influenza and pneumonia*.

Leading underlying natural causes of death for males and females

Tables 4.5 to 4.7 present the ten leading underlying natural causes of death for the three years for males and females separately.

Seven of the ten leading causes – *tuberculosis*, *chronic lower respiratory diseases*, *influenza and pneumonia*, *other forms of heart disease*, *ischaemic heart disease*, *diabetes mellitus* and *Cerebrovascular diseases* – were common for males and females in all three years, although not in the same order. In addition to these five causes, in 1997 *malignant neoplasms of digestive organs* was also common to males and females; in 1999, *intestinal infectious diseases* and *human immunodeficiency virus diseases* were common; while in 2001 *certain disorders involving the immune mechanism* and *intestinal infectious diseases* were in both lists.

Table 4.5: Number and percentage of deaths due to the ten leading underlying natural causes of death, for males and females: 1997

Causes of death (Based on the Tenth Revision, International Classification of Disease, 1992)	Male			Female		
	Rank	No.	%	Rank	No.	%

Age differences

Table 4.8 presents the leading underlying natural causes of death by broad age groups of the deceased for the three years under consideration. Four age groups are used for this analysis: 0-14, 15-49, 50-64, and 65 and above. It should be noted that the age groupings used have an impact on the rankings. For example, in all three years the 15-49 age group showed a higher ranking of *human immunodeficiency virus disease* than the 15-24 age group. An additional grouping of 15-24 years has therefore been provided (see Table 4.8) as suggested in the ICD-10 recommendations, for purposes of international comparison.

1997

The leading underlying natural causes of death for the age group 0-14 in 1997 were *respiratory and cardiovascular disorders specific to the perinatal period* and *digestive system disorders of foetus and newborn*. Overall, seven of the ten leading causes are related to diseases occurring during the perinatal period, which masks the situation for children aged 1-14. Further details in this regard are presented in the next section.

The age categories 15-49 and 50-64 had six leading causes of death in common in 1997, although the rankings differed. *Tuberculosis* was the most important causes of death in the 15-49 age category. *HIV* as a leading cause was exclusive to this age category, as were *other viral diseases* and *inflammatory diseases of the central nervous system*. In the 50-64 age group, *other forms of heart disease* and *cerebrovascular diseases* were most prevalent.

The 65+ age category shared all ten leading causes of death with the 50-64 age group, although not in the same order and with varying numbers of associated deaths. *Other forms of heart disease* and *cerebrovascular diseases* were the two most important causes of death in the this age group.

1999

The ten leading underlying natural causes of death in the 0-14 age group in 1999 were virtually the same as those for 1997 with the exception of *certain disorders involving the immune mechanism*, which replaced *haemorrhagic and haematological disorders of foetus and newborn*.

The 15-49 and 50-64 age groups had five leading causes in common in 1999, and there were five leading causes in common across these two age groups and the 65+ age group. *Tuberculosis* was again the most important cause of death for these age groups.

The 65+ age group shared all ten leading causes of death with the 50-64 age group although the rankings differed. The top two leading causes of death in the 65+age group were *cerebrovascular diseases* and *other forms of heart disease*, in that order.

2001

In 2001, the ten leading underlying natural causes of death in the 0-14 age group were virtually the same as in 1999 although not in the same order, with *tuberculosis* replacing *foetus and newborn affected by maternal factors and by complications of pregnancy, labour and delivery*. The first four leading causes – *respiratory and cardiovascular disorders specific to the perinatal period*, *digestive system disorders of foetus and newborn*, *other disorders originating in the perinatal period*, and *intestinal infectious diseases* – were the same for both years. *Tuberculosis* appeared in the top ten causes for this age group for the first time.

As in 1999, the 15-49 and 50-64 age groups had five leading causes in common in 2001, and shared four leading causes with the 65+ age group. In the 15-49 age group, *tuberculosis* was the most prevalent. Exclusive to this age group was *inflammatory diseases of the central nervous system*.

The 65+ age group had nine leading causes of death in common with the 50-64 age group although the rankings differed. The leading causes of death in the 65+ age group were *cerebrovascular diseases*, and *other forms of heart disease*. Exclusive to this age group in 2001 were *intestinal and infectious diseases*.

Leading underlying natural causes of infant and child mortality

Table 4.9 shows the variation across the three years of leading underlying natural causes of death for all children below one year and those between one and four years. Infants aged less than one year had nine of the ten leading causes of death in common across the three years, although not in the same order. The first six causes of infant death in 1997 and 1999 were identical, while the first three causes of infant death were identical across the three years – *respiratory and cardiovascular disorders specific to the perinatal period, digestive system disorders of foetus and newborn, and disorders originating in the perinatal period*. It is important to note that infants under one year had the highest proportion of deaths due to *respiratory and cardiovascular disorders specific to the perinatal period*, which also showed a steady increase across the three years.

Children aged between one year and four years had nine of the ten leading causes of death in common across the three years studied, although not in the same order. The top three leading causes of child mortality across the three years were *intestinal infectious diseases, malnutrition and influenza and pneumonia*. Furthermore, there was a steady increase in the number and percentage of deaths due to *intestinal infectious diseases* and *influenza and pneumonia*. However, an increase in the absolute number of deaths attributable to *malnutrition* did not translate into an increase in the percentage of such deaths, which in fact showed a steady decrease. *Certain disorders involving the immune mechanism* appeared in all three years, as did *human immunodeficiency virus diseases*. Other diseases of importance to this age group were *other viral diseases*, appearing in the 1999 and 2001 lists, while *other bacterial diseases* appeared in the 1997 list.

Table 4.9: The ten leading underlying natural causes of death for selected age groups: 1997, 1999 and 2001

Provincial differences

Table 4.10 shows the provincial variations of the ten leading underlying natural causes of death. In 1997, the nine provinces had six leading causes of death in common – *cerebrovascular diseases, other forms of heart disease, tuberculosis, chronic lower respiratory diseases, diabetes mellitus and influenza and pneumonia* – although not in the same order. In four provinces – Eastern Cape, Northern Cape, Free State and KwaZulu-Natal – *tuberculosis* was the leading cause of death. This cause ranked no lower than fifth in the other five provinces. *Other forms of heart disease* was the leading cause of death in four provinces (North West, Gauteng, Mpumalanga and Limpopo) and no lower than fourth in the other five provinces. In the Western Cape, *ischaemic heart diseases* was the leading cause of death – this ranked as low as ninth position in the Eastern Cape.

Other leading causes common to more than one province were *malignant neoplasms of digestive organs and hypertensive diseases* (seven provinces), *ischaemic heart diseases and intestinal infectious diseases* (five provinces), *respiratory and cardiovascular disorders specific to the perinatal period* (six provinces) and *digestive system disorders of foetus and newborn* (three provinces). Exclusive to Mpumalanga and Free State was *human immunodeficiency virus diseases*, while *malignant neoplasms of respiratory and intrathoracic organs* was exclusive to Western Cape.

In 1999, all nine provinces had four leading causes of death in common – *cerebrovascular diseases, other forms of heart disease, tuberculosis and chronic lower respiratory diseases* – although not in the same order. *Tuberculosis* was the leading cause of death in all nine provinces.

Other leading causes common to more than one province were *influenza and pneumonia* (eight provinces), *ischaemic heart diseases* (seven provinces), *diabetes mellitus, human immunodeficiency virus disease and respiratory and cardiovascular disorders specific to the perinatal period* (six provinces). *Intestinal infectious diseases, hypertensive diseases and malignant neoplasms of the digestive organs* were common to five provinces, while *certain disorders involving the immune mechanism* were common to four provinces. Exclusive to Free State and Western Cape were *digestive system disorders of foetus and newborn and malignant neoplasms of respiratory and intrathoracic organs* respectively.

In 2001, the nine provinces had six leading causes of death in common – *cerebrovascular diseases, other forms of heart disease, tuberculosis, diabetes mellitus, chronic lower respiratory diseases, and intestinal infectious diseases* – although not in the same order. *Tuberculosis* was the leading cause of death in seven provinces – Eastern Cape, Western Cape, Northern Cape, KwaZulu-Natal, Gauteng and North West – and the second leading cause in the other two provinces. *Influenza and pneumonia* was the leading cause of death in those two provinces (Free State and Limpopo) and was second in five other provinces.

Other leading causes common to more than one province were *certain disorders involving the immune mechanism and influenza and pneumonia* (seven provinces); *respiratory and cardiovascular disorders specific to the perinatal period* (five provinces); and *human immunodeficiency virus disease, ischaemic heart diseases and hypertensive diseases* (four provinces). *Malignant neoplasms of the digestive organs* was common to three provinces, while *digestive system disorders of foetus and newborn and malignant neoplasms of respiratory and intrathoracic organs* were exclusive to Limpopo and Western Cape respectively.

Detailed tables with the top ten leading underlying causes of death broken down by province, sex and age group, for each of the three years studied, are provided in Appendix G.

4.6 Non-natural causes of death

As indicated in the introduction, documenting non-natural causes of death is crucial given the high levels of violence experienced in the country. When completing the death notification form medical practitioners are expected to specify whether the deceased died from natural or non-natural causes. In addition, from the cause of death specified on the death notification form and the resulting ICD-10 code it can be determined whether the cause of death was natural or non-natural. This release makes use of the latter method and therefore treats codes V01-Y98 – external causes of morbidity and mortality – as non-natural causes of death.

Non-natural deaths mainly comprised *events of undetermined intent* for all the years. According to law, the police have final responsibility for indicating the specific cause of death whenever a non-natural death occurs. Unfortunately, the law also allows the police to complete the death notification forms without explicitly stating the cause of death where it is difficult to ascertain. These cases were omitted from this analysis.

Table 4.11: Events of undetermined intent: 1997, 1999 and 2001

Underlying causes of death	Deaths			%		
	1997	1999	2001	1997	1999	2001
Y10 Poisoning by and exposure to nonopioid analgesics, antipyretics and antirheumatics	5	7	10	0,0	0,0	0,0

Y34 Unspecified event	41 423	21 048	17 469	88,4	56,6	50,2
Total	46 872	37 173	34 813	100,0	100,0	100,0

Table 4.11 provides a disaggregation of the broad group of *events of undetermined intent* to provide a further understanding of the specific events captured by this grouping. Over the three years the proportion of deaths classified as *unspecified event* decreased from 88% to 50%, which indicates an improvement in the accuracy of identification of specific causes.

Tables 4.12 to 4.14 show the age and sex distribution of the broad groups of underlying non-natural causes of death in 1997, 1999 and 2001. These causes of death, in order of relative importance, are: 1) *events of undetermined intent*; 2) *other external causes of accidental injury*; 3) *transport accidents*; 4) *assault*; 5) *complications of medical and surgical care*; 6) *intentional self-harm*. Non-natural causes of death collectively accounted for 17,0% of all deaths which occurred in 1997; this figure dropped to 13,9% in 1999 and 11,1% in 2001.

A similar pattern was noted when comparing the data for males and females although the rankings were not in exactly the same order. Non-natural causes of death for males maintained the same sequence across the three years with *events of undetermined intent* accounting for 88% of all the non-natural deaths in 1997, and 71% for both 1999 and 2001. Furthermore, male non-natural deaths outnumbered female non-natural deaths by 3:1.

The ranking order for females was somewhat similar to that of males. The order was slightly different in 1997, with *complications of medical and surgical care*, and *transport accidents* ranking third and fourth respectively.

The most frequent non-natural cause of death for all four broad age groups was *events of undetermined intent*, accounting for 87% of all non-natural deaths in 1997, 70% in 1999 and 69% in 2001. The second most frequent non-natural cause of death for the 0-14 age grouping in 1997 was *complications of medical and surgical care*; in 1999 and 2001 it was *transport accidents*.

The 15-49, 50-64 and 65+ age groups shared *other external causes of accidental injury* as the second most frequent non-natural cause of death in all the three years. The 15-49 age group had the highest proportion of deaths attributable to non-natural causes across the three years, 90% in 1997 and 72% in 1999 and 2001.

Tables 4.15, which follows the age breakdowns, gives the provincial distribution of non-natural causes of death in the country in 1997, 1999 and 2001. As for the total population, the percentage of all deaths attributable to non-natural causes declined over the three years examined across all provinces. In 1997 and 1999 Western Cape had the highest proportion of deaths linked to *events of undetermined intent*, while in 2001 the leading province in this regard was Gauteng.

Table 4.12: Underlying non-natural causes of death by age group and sex: 1997

4.7 Comparison between underlying and reported causes of death

Table 4.16 provides further insights into whether the results on the underlying causes of death reflect the profile portrayed by the information on recorded causes. The table shows the number of deaths due to the ten leading underlying causes of death for each year, and the number of cases for which those specific causes were entered on the death notification form (whether as a single or multiple cause). The figures indicate that the numbers of deaths due to *tuberculosis*, *cerebrovascular diseases* and *diabetes mellitus* as the underlying causes were relatively close to the number of cases which had these conditions entered on the forms across the three years. The same pertains to *HIV* in 1999, and *intestinal infectious diseases* in 1999 and 2001.

Table 4.16: Comparison between underlying and reported causes of death

Rank		No. of deaths due to this underlying cause	No. of forms with this recorded cause	% *
1997				
1	Tuberculosis (A15 - A19)	22 021	25 640	85,89
2	Other forms of heart disease (I30 – I52)	20 103	60 768	33,08
3	Cerebrovascular diseases (I60 - I69)	16 992	24 039	70,69
4	Influenza and pneumonia (J10 - J18)	11 503	24 698	46,57
5	Diabetes mellitus (E10 - E14)	10 828	12 133	89,24
6	Chronic lower respiratory diseases (J40 - J47)	10 747	15 330	70,10
7	Ischaemic heart diseases (I20 - I25)	9 794	14 512	67,49
8	Malignant neoplasms of digestive organs (C15 - C26)	8 914	9 499	93,84
9	Hypertensive diseases (I10 - I15)	7 706	19 786	38,95
10	Respiratory and cardiovascular disorders specific to the perinatal period (P20 - P29)	7 125	15 449	46,12
1999				
1	Tuberculosis (A15 - A19)	34 173	39 759	85,95
2	Other forms of heart disease (I30 – I52)	20 120	53 977	37,28
3	Cerebrovascular diseases (I60 - I69)	19 948	28 218	70,69
4	Influenza and pneumonia (J10 - J18)	19 135	39 069	48,98
5	Chronic lower respiratory diseases (J40 - J47)	12 573	18 242	68,92
6	Diabetes mellitus (E10 - E14)	12 540	14 244	88,04
7	Ischaemic heart diseases (I20 - I25)	11 426	16 867	67,74
8	Intestinal infectious diseases (A00 - A09)	11 155	13 206	84,47
9	Human immunodeficiency virus [HIV] diseases (B20 – B24)	9 925	10 331	96,07
10	Hypertensive diseases (I10 - I15)	9 427	24 911	37,84
2001				
1	Tuberculosis (A15 - A19)	50872	56985	89,27
2	Influenza and pneumonia (J10 - J18)	31495	55115	57,14
3	Other forms of heart diseases (I30 - I52)	22602	48927	46,20
4	Cerebrovascular diseases (I60 - I69)	22577	31104	72,59
5	Intestinal infectious diseases (A00 - A09)	16060	18241	88,04
6	Chronic lower respiratory diseases (J40 - J47)	14681	20136	72,91
7	Diabetes mellitus (E10 - E14)	14557	16207	89,82
8	Ischaemic heart diseases (I20 - I25)	11777	17380	67,76
9	Certain disorders involving the immune mechanism (D80 - D89)	11670	20345	57,36
10	Hypertensive diseases (I10 - I15)	10748	27622	38,91

* Number of deaths due to the underlying cause, divided by the number of forms where this cause appeared as a recorded cause, expressed as a percentage.

5. Concluding remarks

The capture and processing of data from death notification forms has provided requisite information which has enabled the studying of mortality patterns and causes of death over a seven year period in South Africa. In addition to capturing the data provided on the death notification forms, an underlying cause of death for each case was derived from the reported causes of death using an internationally acclaimed algorithm. The present study represents a more systematic approach of determining the underlying cause of death than was used for the release based on the 12% sample of forms for 1997 to 2001 (Stats SA, 2002a), which relied upon the expertise of health professionals to determine the underlying cause of death.

The most significant trend observed is that the number of reported deaths has been increasing steadily, which is partly associated with population growth and with improved notification. The proportion of deaths in the age group 20-49 is increasing. While an increasing number of deaths are associated with lifestyle diseases (such as heart disease and diabetes) as the underlying cause, the dominant contributors to the growth in mortality are deaths associated with *tuberculosis*, and *influenza and pneumonia*. *Malnutrition* was among the ten leading causes of death among children aged under 4. The numbers of deaths linked to malnutrition increased steadily.

The proportion of reported deaths of females is increasing relative to the total. Of the leading underlying causes of death, the main differences between the proportions of male and female deaths occur in relation to *tuberculosis* and *chronic lower respiratory diseases*, where male deaths predominate, and *cerebrovascular diseases* and *other forms of heart disease*, where female deaths predominate.

During the period for which death notification forms have been captured, the majority of deaths were linked to natural causes of death. Overall, there has been a decline in the number and percentage of deaths due to non-natural causes of death.

More in-depth analysis, including a detailed comparison between data captured from DNFs with death data recorded in the population register as well as with data collected in the last two population censuses (1996 and 2001), is to follow.

APPENDIX A

Definitions

- A *death* is a principal event and is the disappearance of life at any time after birth has taken place.
- *Causes of death* are all those diseases, morbid conditions, or injuries that either resulted in or contributed to death, and the circumstances of the accident or violence which produced any such injuries.
- *Immediate cause* is the disease or condition directly leading to death.
- *Contributing causes* are morbid conditions, if any, giving rise to the immediate cause of death.
- An *underlying cause of death* (previously known as primary cause) is defined as: 'The disease or injury that initiated the train of events leading to death, or the circumstances of the accident or violence that produced the fatal injury.'
- *Multiple causes of death* are defined in ICD-10 as: 'All morbid conditions, diseases and injuries entered on the death certificate. These include those involved in the morbid train of events leading to the death which were classified as either the underlying cause, the intermediate cause, or any intervening cause and those conditions which contributed to death but were not related to the disease or condition causing death.'
- *Leading underlying causes of death* are the most frequent underlying causes of death in any given population; in this release the underlying causes of death are ranked according to frequency.
- *Human immunodeficiency virus* (HIV) is defined in the Dictionary of Epidemiology as follows: 'The pathogenic organism responsible for the acquired immunodeficiency syndrome (AIDS), formally or also known as the lymphadenopathy virus (LAV), the name given by the original French discoverers Montagnier et al. in 1983, or the human T-cell lymphotropic virus type III (HTLV-III), the name given by Gallo et al. to the virus they reported in 1984.'
- *Population group*: According to the Population Registration Act Repeal Act (No. 114 of 1991), the South African Population Register no longer stores information regarding the population group of individuals whose details are on the register. This Repeal Act is still in place; therefore, the population group used in this report refers to the population group as identified by the certifying physician/professional nurse on the death notification form and is only used for statistical purposes.

Date		Place of burial / cremation			
D CERTIFICATE BY ATTENDING MEDICAL PRACTITIONER / PROFESSIONAL NURSE			Postal Address		
I, the undersigned, hereby certify that the deceased named in Section A, to the best of my knowledge and belief, died solely and exclusively due to NATURAL CAUSES specified in Section G <input type="checkbox"/>			Postal Code		
I, the undersigned, am not in the position to certify that the deceased died exclusively due to natural causes <input type="checkbox"/>			SAMDC / SANC Reg. No.		
INITIALS AND SURNAME			SIGNATURE		
Date			Date signed		
CERTIFICATE BY DISTRICT SURGEON / FORENSIC PATHOLOGIST			Postal Address		
I, the undersigned, hereby certify that a medicolegal post-mortem examination has been conducted on the body of the person whose particulars are given in Section A and that the body is no longer required for the purpose of the Inquest Act, 1959 (Act No. 58 of 1959) and that the cause of death is:			Postal Code		
Unnatural <input type="checkbox"/> Under investigation <input type="checkbox"/>			Mortuary Reference		
Natural (Cause of Death as indicated in Section G) <input type="checkbox"/>			SAMDC Reg. No.		
Initials and Surname			Date		
Place of post-mortem			Date signed		
Signature			Date signed		
E FOR OFFICIAL USE ONLY			Office Stamp		
Registration of death approved and burial order issued			Initials and Surname of Registrar		
Address			Force No. / Designation No.		
			Persal No.		
Date			Signature		

* Someone who smokes tobacco on most days

APPENDIX C

Comparison between manual and automated methods of determining the underlying causes of death

The cases of deaths processed in the 12% sample, for which an underlying cause of death was manually determined by a health professional, were matched by ID number to the corresponding records in the dataset compiled for this release. A total of 125 233 cases were matched. A comparison of the underlying cause of death between corresponding records was carried out to ascertain the level of agreement between the two methodologies.

Table C1 provides the results of this exercise. The key results are:

- Concurrence in the underlying cause of death was found for 74% of the 125 223 records.
- Concurrence declined as the number of causes listed on the death notification form increased, from 84% when only one cause was recorded, to about 40% when there were five causes recorded on the form.

The above results underscore the fact that manual determination of the underlying cause of death, being subjective, may not be appropriate when several causes are recorded on the notification form.

Differences in the coding of the reported causes of death in the two separate exercises would also contribute to the lack of concordance of the underlying cause of death.

Table C1: Comparison of the underlying causes of death derived from ACME and the manual procedure used during the processing of the 12% sample

Number of reported causes of death	ACME vs Sample Underlying Cause of Death				Total
	MATCH		NON-MATCH		
	Number	%	Number	%	
1	60 380	84,06	11 448	15,94	71 828
2	22 885	65,57	12 017	34,43	34 902
3	7 375	53,52	6 405	46,48	13 780
4	1 726	46,19	2 011	53,81	3 737
5	386	39,55	590	60,45	976
Total	92 752	74,07	32 471	25,93	125 223

APPENDIX D: Comparison of ten leading underlying causes of death according to SA and NCHS ranking methods, 1997, 1999 & 2003

SA ranking method		No. of deaths	NCHS ranking method (developed for use with ICD 10 according to recommendations by 1951 Public Health Conference)	No. of deaths
1997				
1	Events of undetermined intent (Y10 - Y34)	46,872	1 Diseases of heart	36,493
2	Tuberculosis (A15 - A19)	22,021	2 Malignant neoplasm	27,012
3	Other forms of heart disease (I30 - I52)	20,103	3 Tuberculosis	22,021
4	Cerebrovascular diseases (I60 - I69)	16,992	4 Certain conditions originating in the perinatal period	21,340
5	Influenza and pneumonia (J10 - J18)	11,503	5 Cerebrovascular diseases	16,992
6	Diabetes mellitus (E10 - E14)	10,828	6 Influenza and pneumonia	11,503
7	Chronic lower respiratory diseases (J40 - J47)	10,747	7 Diabetes mellitus	10,828
8	Ischaemic heart diseases (I20 - I25)	9,794	8 Chronic lower respiratory diseases	10,747
9	Malignant neoplasms of digestive organs (C15 - C26)	8,914	9 Human immunodeficiency virus (HIV) disease	6,234
10	Hypertensive diseases (I10 - I15)	7,706	10 Accidents (unintentional injuries)	4,406
	Other causes	152,807	Other rankable causes	46,631

Ischaemic heart diseases (I20 - I25)	9,794	3.1
Malignant neoplasms of digestive organs (C15 - C26)	8,914	2.8
Hypertensive diseases (I10 - I15)	7,706	2.4
Respiratory and cardiovascular disorders specific to the perinatal period (P20 - P29)	7,125	2.2
Intestinal infectious diseases (A00 - A09)	6,522	2.0
Human immunodeficiency virus [HIV] diseases (B20 - B24)	6,234	2.0
Digestive system disorders of foetus and newborn (P75 - P78)	5,103	1.6
General symptoms and signs (R50 - R69)	4,861	1.5
Malignant neoplasms of respiratory and intrathoracic organs (C30 - C39)	4,543	1.4
Diseases of liver (K70 - K77)	4,329	1.4
Other disorders originating in the perinatal period (P90 - P96)	3,507	1.1
Renal failure (N17 - N19)	3,429	1.1
Certain disorders involving the immune mechanism (D80 - D89)	3,298	1.0
Malignant neoplasms of female genital organs (C51 - C58)	2,761	0.9
Other external causes of accidental injury (W00 - X59)	2,667	0.8
Malignant neoplasms of ill-defined, secondary and unspecified sites (C76 - C80)	2,491	0.8
Episodic and paroxysmal disorders (G40 - G47)	2,261	0.7
Other bacterial diseases (A30 - A49)	2,041	0.6
Malnutrition (E40 - E46)	1,851	0.6
Malignant neoplasms of lymphoid, haematopoietic and related tissue (C81 - C96)	1,750	0.5
Transport accidents (V01 - V99)	1,733	0.5
Metabolic disorders (E70 - E88)	1,661	0.5
Disorders related to length of gestation and foetal growth (P05 - P08)	1,660	0.5
Pulmonary heart disease and diseases of pulmonary circulation (I26 - I28)	1,639	0.5
Inflammatory diseases of the central nervous system (G00 - G09)	1,624	0.5
Malignant neoplasms of breast (C50)	1,617	0.5
Malignant neoplasms of male genital organs (C60 - C63)	1,573	0.5
Other diseases of the respiratory system (J90 - J94)	1,571	0.5
Diseases of arteries, arterioles and capillaries (I70 - I79)	1,528	0.5
Diseases of oesophagus, stomach and duodenum (K20 - K31)	1,453	0.5
Infections specific to the perinatal period (P35 - P39)	1,387	0.4
Assault (X85 - Y09)	1,346	0.4
Other respiratory diseases principal affecting the interstitium (J80 - J84)	1,322	0.4
Foetus and newborn affected by maternal factors & complications of pregnancy, labour & delivery (P00 - P04)	1,295	0.4
Complications of medical and surgical care (Y40 - Y84)	1,253	0.4
Aplastic and other anaemias (D60 - D64)	1,210	0.4
Other viral diseases (B25 - B34)	1,127	0.4
Other acute lower respiratory infections (J20 - J22)	1,072	0.3
Other diseases of the intestines (K55 - K63)	909	0.3
Malignant neoplasms of lip, oral cavity and pharynx (C00 - C14)	883	0.3
Disorder of gallbladder, biliary tract and pancreas (K80 - K87)	737	0.2
Neoplasms of uncertain or unknown behaviour (D37 - D48)	714	0.2
Cerebral palsy and other paralytic syndromes (G80 - G83)	704	0.2
Protozoal diseases (B50 - B64)	680	0.2
Haemorrhagic and haematological disorders of foetus and newborn (P50 - P61)	641	0.2
Malignant neoplasms of urinary tract (C64 - C68)	639	0.2
Organic, including symptomatic, mental disorders (F00 - F09)	616	0.2
Arthropathies (M00 - M25)	603	0.2
Other diseases of digestive system (K90 - K93)	566	0.2
Lung diseases due to external agents (J60 - J70)	564	0.2
Noninfective enteritis and colitis (K50 - K52)	562	0.2
Chronic rheumatic heart diseases (I05 - I09)	533	0.2
Congenital malformations of the circulatory system (Q20 - Q28)	523	0.2
Mental and behavioural disorders due to psychoactive substance use (F10 - F19)	519	0.2
Other disorders of glucose regulation and pancreatic internal secretion (E15 - E16)	497	0.2
Other disorders of the skin and subcutaneous (L80 - L99)	497	0.2

APPENDIX E: All underlying causes of death, 1997-2003, by single years

1997 (continued)	No. of deaths	%
Other degenerative diseases of the nervous system (G30 - G32)	477	0.1
Malignant neoplasms of mesothelial and soft tissue (C45 - C49)	474	0.1

APPENDIX E: All underlying causes of death, 1997-2003, by single years

1998	No. of deaths	%
All causes	367,689	100.0
Ill-defined and unknown causes of mortality (R95 - R99)	45,681	12.4
Events of undetermined intent (Y10 - Y34)	45,449	12.4
Tuberculosis (A15 - A19)	28,487	7.7
Other forms of heart disease (I30 - I52)	21,721	5.9
Cerebrovascular diseases (I60 - I69)	18,667	5.1
Influenza and pneumonia (J10 - J18)	17,019	4.6
Chronic lower respiratory diseases (J40 - J47)	13,145	3.6
Diabetes mellitus (E10 - E14)	12,279	3.3
Ischaemic heart diseases (I20 - I25)	10,687	2.9
Malignant neoplasms of digestive organs (C15 - C26)	9,169	2.5
Intestinal infectious diseases (A00 - A09)	8,780	2.4
Hypertensive diseases (I10 - I15)	8,749	2.4
Respiratory and cardiovascular disorders specific to the perinatal period (P20 - P29)	8,107	2.2
Human immunodeficiency virus [HIV] diseases (B20 - B24)	7,266	2.0
Digestive system disorders of foetus and newborn (P75 - P78)	6,226	1.7
Certain disorders involving the immune mechanism (D80 - D89)	5,695	1.5
General symptoms and signs (R50 - R69)	5,364	1.5
Malignant neoplasms of respiratory and intrathoracic organs (C30 - C39)	4,812	1.3
Diseases of liver (K70 - K77)	4,603	1.3
Other disorders originating in the perinatal period (P90 - P96)	3,991	1.1
Renal failure (N17 - N19)	3,745	1.0
Other external causes of accidental injury (W00 - X59)	3,565	1.0
Malignant neoplasms of female genital organs (C51 - C58)	2,898	0.8
Transport accidents (V01 - V99)	2,888	0.8
Malignant neoplasms of ill-defined, secondary and unspecified sites (C76 - C80)	2,760	0.8
Episodic and paroxysmal disorders (G40 - G47)	2,551	0.7
Other bacterial diseases (A30 - A49)	2,342	0.6
Malnutrition (E40 - E46)	2,223	0.6
Inflammatory diseases of the central nervous system (G00 - G09)	2,102	0.6
Pulmonary heart disease and diseases of pulmonary circulation (I26 - I28)	2,100	0.6
Other diseases of the respiratory system (J90 - J94)	2,053	0.6
Metabolic disorders (E70 - E88)	2,032	0.6
Disorders related to length of gestation and foetal growth (P05 - P08)	1,936	0.5
Other viral diseases (B25 - B34)	1,859	0.5
Malignant neoplasms of lymphoid, haematopoietic and related tissue (C81 - C96)	1,801	0.5
Malignant neoplasms of breast (C50)	1,758	0.5
Malignant neoplasms of male genital organs (C60 - C63)	1,623	0.4
Diseases of oesophagus, stomach and duodenum (K20 - K31)	1,617	0.4
Diseases of arteries, arterioles and capillaries (I70 - I79)	1,606	0.4
Foetus and newborn affected by maternal factors and by complications of pregnancy, labour and delivery (P00 - P04)	1,569	0.4
Complications of medical and surgical care (Y40 - Y84)	1,528	0.4
Aplastic and other anaemias (D60 - D64)	1,485	0.4
Other acute lower respiratory infections (J20 - J22)	1,438	0.4
Infections specific to the perinatal period (P35 - P39)	1,410	0.4
Assault (X85 - Y09)	1,348	0.4
Other respiratory diseases principally affecting the interstitium (J80 - J84)	1,255	0.3
Malignant neoplasms of lip, oral cavity and pharynx (C00 - C14)	968	0.3
Cerebral palsy and other paralytic syndromes (G80 - G83)	964	0.3
Protozoal diseases (B50 - B64)	916	0.2
Other diseases of intestines (K55 - K63)	902	0.2
Noninfective enteritis and colitis (K50 - K52)	852	0.2
Neoplasms of uncertain or unknown behaviour (D37 - D48)	832	0.2
Disorder of gallbladder, biliary tract and pancreas (K80 - K87)	750	0.2
Haemorrhagic and haematological disorders of foetus and newborn (P50 - P61)	697	0.2
Organic, including symptomatic, mental disorders (F00 - F09)	672	0.2
Symptoms and signs involving the circulatory and respiratory systems (R00 - R09)	653	0.2
Lung diseases due to external agents (J60 - J70)	640	0.2
Other diseases of digestive system (K90 - K93)	628	0.2
Malignant neoplasms of urinary tract (C64 - C68)	615	0.2
Malignant neoplasms of independent (primary) multiple sites (C97)	614	0.2
Other disorders of glucoses regulation and pancreatic internal secretion (E15 - E16)	610	0.2
Arthropathies (M00 - M25)	603	0.2
Mental and behavioural disorders due to psychoactive substance use (F10 - F19)	573	0.2
Other disorders of the nervous system (G90 - G98)	571	0.2
Congenital malformations of the circulatory system (Q20 - Q28)	551	0.1
Chronic rheumatic heart diseases (I05 - I09)	525	0.1
Other disorders of the skin and subcutaneous (L80 - L99)	523	0.1

APPENDIX E: All underlying causes of death, 1997-2003, by single years

1998 (continued)	No. of deaths	%
Malignant neoplasms of mesothelial and soft tissue (C45 - C49)	522	0.1
Transitory endocrine and metabolic disorders specific to foetus and newborn (P70 - P74)	505	0.1
Other degenerative diseases of the nervous system (G30 - G32)	492	0.1
Mycoses (B35 - B49)	445	0.1
Other diseases of pleura (J90 - J94)	436	0.1
Congenital malformations of the nervous system (Q00 - Q07)	426	0.1
Symptoms and signs involving digestive system and abdomen (R10 - R19)	420	0.1
Diseases of veins, lymphatic vessels and lymph nodes, not elsewhere classified (I80 - I89)	404	0.1
Malignant neoplasms of eye, brain and other parts of central nervous system (C69 - C72)	398	0.1
Suppurative and necrotic conditions of lower respiratory tract (J85 - J86)	386	0.1
Sequelae of infectious and parasitic diseases (B90 - B94)	342	0.1
Extrapyramidal and movement disorders (G20 - G26)	325	0.1
Melanoma and other malignant neoplasms of skin (C43 - C44)	310	0.1
Other congenital malformations (Q80 - Q89)	307	0.1
Other diseases of urinary system (N30 - N39)	290	0.1
Infections of the skin and subcutaneous tissue (L00 - L08)	286	0.1
Viral hepatitis (B15 - B19)	283	0.1
Obesity and other hyperalimentation (E65 - E68)	271	0.1
Glomerular diseases (N00 - N08)	247	0.1

Maternal care related to the foetus and amniotic cavity and possible delivery problems (O30 - O48)	56	0.0

APPENDIX E: All underlying causes of death, 1997-2003, by single years

1999 (concluded)	No. of deaths	%
Other and unspecified disorders of the circulatory system (I95 - I99)	55	0.0
Other disorders of kidney and ureter (N25 - N29)	52	0.0
Birth trauma (P10 - P15)	51	0.0
Congenital malformation of urinary system (Q60 - Q64)	49	0.0
Symptoms and signs involving cognition, perception, emotional state and behaviour (R40 - R46)	49	0.0
Other diseases of blood and blood-forming organs (D70 - D77)	48	0.0
Abnormal findings on examination of blood without diagnosis (R70 - R79)	47	0.0
Congenital malformations of and deformations of the musculoskeletal system (Q65 - Q79)	46	0.0
Diseases of oral cavity, salivary glands and jaws (K00 - K14)	46	0.0
Dermatitis and eczema (L20 - L30)	43	0.0
Behavioural syndromes associated with physiological disturbances and physical factors (F50 - F59)	39	0.0
Neurotic, stress-related and somatoform disorders (F40 - F48)	34	0.0
Mood [affective] disorders (F30 - F39)	31	0.0
Unspecified mental disorder (F99)	31	0.0
Haemolytic anaemias (D55 - D59)	29	0.0
Urticaria and erythema (L50 - L54)	28	0.0
Other maternal disorders predominantly related to pregnancy (O20 - O29)	25	0.0
In situ neoplasms (D00 - D09)	24	0.0
Symptoms and signs involving the nervous and musculoskeletal systems (R25 - R29)	23	0.0
Abnormal findings on diagnostic imaging in function studies without diagnosis (R90 - R94)	21	0.0
Sequelae of external causes of morbidity and mortality (Y85 - Y89)	21	0.0
Cleft lip and cleft palate (Q35 - Q37)	19	0.0
Legal intervention and operations of war (Y35 - Y36)	19	0.0
Nerve, nerve root and plexus disorders (G50 - G59)	17	0.0
Symptoms and signs involving the urinary system (R30 - R39)	17	0.0
Arthropod-borne viral fevers and viral haemorrhagic fevers (A90 - A99)	15	0.0
Bullous disorders (L10 - L14)	15	0.0
Visual disturbances and blindness (H53 - H54)	13	0.0
Abnormal findings on examination of other fluids, substances and tissues without diagnosis (R83 - R89)	12	0.0
Certain zoonotic bacteria diseases (A20 - A28)	11	0.0
Pediculosis, acariasis and other infestations (B85 - B89)	11	0.0
Papulosquamous disorders (L40 - L45)	10	0.0
Symptoms and signs involving skin and subcutaneous tissue (R20 - R23)	10	0.0
Disorders of the breast (N60 - N64)	9	0.0
Disorders of adult personality and behaviour (F60 - F69)	8	0.0
Urolithiasis (N20 - N23)	8	0.0
Disorders of eyelid, lacrimal system and orbit (H00 - H06)	7	0.0
Rickettsioses (A75 - A79)	7	0.0
Unspecified/ Not yet resolved	6	0.0
Behavioural and emotional disorders with onset usually occurring in childhood and adolescence (F90 - F98)	5	0.0
Disorders of psychological development (F80 - F89)	5	0.0
Disorders of sclera, cornea, iris and ciliary body (H15 - H22)	5	0.0
Other spirochactal diseases (A65 - A69)	5	0.0
Congenital malformations of eye, ear, face and neck (Q10 - Q18)	4	0.0
Disorders of choroid and retina (H30 - H36)	4	0.0
Disorders of vitreous body and globe (H43 - H45)	4	0.0
Diseases of external ear (H60 - H62)	3	0.0
Congenital malformation of genital organs (Q50 - Q56)	2	0.0
Disorders of conjunctiva (H10 - H13)	2	0.0
Other diseases caused by chlamydiae (A70 - A74)	2	0.0
Other disorders of ear (H90 - H95)	2	0.0
Symptoms and signs involving speech and voice (R47 - R49)	2	0.0
Disorders of lens (H25 - H28)	1	0.0
Disorders of ocular muscles, binocular movement, accommodation and refraction (H49 - H52)	1	0.0
Disorders of skin appendages (L60 - L75)	1	0.0
Glaucoma (H40 - H42)	1	0.0
Other disorders of the musculoskeletal system and connective tissue (M95 - M99)	1	0.0
Radiation-related disorders of the skin and subcutaneous tissue (L55 - L59)	1	0.0
Abnormal findings on examination of urine without diagnosis (R80 - R82)	0	0.0
Delivery (O80 - O84)	0	0.0
Diseases of inner ear (H80 - H83)	0	0.0
Disorders of optic nerve and visual pathways (H46 - H48)	0	0.0
Mental retardation (F70 - F79)	0	0.0
Other disorders of eye and adnexa (H55 - H59)	0	0.0
Other disorders of the genito-urinary system (N99)	0	0.0

APPENDIX E: All underlying causes of death, 1997-2003, by single years

2000	No. of deaths	%
All causes	413,969	100.0
Ill-defined and unknown causes of mortality (R95 - R99)	42,897	10.4
Tuberculosis (A15 - A19)	42,102	10.2
Events of undetermined intent (Y10 - Y34)	36,695	8.9
Influenza and pneumonia (J10 - J18)	24,580	5.9

Hernia (K40 - K46)	117	0.0
Malignant neoplasms of thyroid and other endocrine glands (C73 - C75)	116	0.0
Complications of labour and delivery (O60 - O75)	115	0.0
Diseases of appendix (K35 - K38)	104	0.0
Polyneuropathies and other disorders of the peripheral nervous system (G60 - G64)	101	0.0
Helminthiasis (B65 - B83)	96	0.0
Diseases of myoneural junction and muscle (G70 - G73)	88	0.0
Noninflammatory disorders of female genital tract (N80 - N98)	76	0.0
Dorsopathies (M40 - M54)	74	0.0
Other obstetric conditions not elsewhere classified (O95 - O99)	70	0.0
Disorders of other endocrine glands (E20 - E35)	69	0.0
Other and unspecified disorders of the circulatory system (I95 - I99)	68	0.0
Congenital malformations of and deformations of the musculoskeletal system (Q65 - Q79)	68	0.0
Symptoms and signs involving cognition, perception, emotional state and behaviour (R40 - R46)	68	0.0
Diseases of middle ear and mastoid (H65 - H75)	64	0.0
Sequelae of external causes of morbidity and mortality (Y85 - Y89)	63	0.0
Diseases of oral cavity, salivary glands and jaws (K00 - K14)	60	0.0
Other disorders of kidney and ureter (N25 - N29)	60	0.0
Behavioural syndromes associated with physiological disturbances and physical factors (F50 - F59)	58	0.0
Congenital malformation of urinary system (Q60 - Q64)	56	0.0
Maternal care related to the foetus and amniotic cavity and possible delivery problems (O30 - O48)	54	0.0

APPENDIX E: All underlying causes of death, 1997-2003, by single years

2000 (concluded)	No. of deaths	%
Congenital malformations of the respiratory system (Q30 - Q34)	53	0.0
Abnormal findings on examination of blood without diagnosis (R70 - R79)	50	0.0
Haemolytic anaemias (D55 - D59)	49	0.0
Birth trauma (P10 - P15)	49	0.0
Demyelinating diseases of the central nervous system (G35 - G37)	46	0.0
Urticaria and erythema (L50 - L54)	46	0.0
Neurotic, stress-related and somatoform disorders (F40 - F48)	41	0.0
Acute rheumatic fever (I00 - I02)	41	0.0
Other diseases of blood and blood-forming organs (D70 - D77)	39	0.0
Unspecified mental disorder (F99)	39	0.0
Other maternal disorders predominantly related to pregnancy (O20 - O29)	38	0.0
Symptoms and signs involving the urinary system (R30 - R39)	38	0.0
Abnormal findings on diagnostic imaging in function studies without diagnosis (R90 - R94)	31	0.0
Dermatitis and eczema (L20 - L30)	28	0.0
Mood [affective] disorders (F30 - F39)	27	0.0
Disorders of the breast (N60 - N64)	26	0.0
In situ neoplasms (D00 - D09)	25	0.0
Arthropod-borne viral fevers and viral haemorrhagic fevers (A90 - A99)	23	0.0
Symptoms and signs involving the nervous and musculoskeletal systems (R25 - R29)	18	0.0
Pediculosis, acariasis and other infestations (B85 - B89)	16	0.0
Nerve, nerve root and plexus disorders (G50 - G59)	16	0.0
Papulosquamous disorders (L40 - L45)	16	0.0
Urolithiasis (N20 - N23)	16	0.0
Symptoms and signs involving skin and subcutaneous tissue (R20 - R23)	16	0.0
Bullous disorders (L10 - L14)	14	0.0
Cleft lip and cleft palate (Q35 - Q37)	12	0.0
Legal intervention and operations of war (Y35 - Y36)	12	0.0
Other spirochactal diseases (A65 - A69)	11	0.0
Abnormal findings on examination of other fluids, substances and tissues without diagnosis (R83 - R89)	11	0.0
Visual disturbances and blindness (H53 - H54)	10	0.0
Congenital malformations of eye, ear, face and neck (Q10 - Q18)	9	0.0
Disorders of adult personality and behaviour (F60 - F69)	8	0.0
Disorders of psychological development (F80 - F89)	7	0.0
Symptoms and signs involving speech and voice (R47 - R49)	7	0.0
Congenital malformation of genital organs (Q50 - Q56)	5	0.0
Certain zoonotic bacteria diseases (A20 - A28)	4	0.0
Rickettsioses (A75 - A79)	4	0.0
Disorders of eyelid, lacrimal system and orbit (H00 - H06)	4	0.0
Diseases of external ear (H60 - H62)	4	0.0
Radiation-related disorders of the skin and subcutaneous tissue (L55 - L59)	4	0.0
Abnormal findings on examination of urine without diagnosis (R80 - R82)	4	0.0
Unspecified/ Not yet resolved	4	0.0
Behavioural and emotional disorders with onset usually occurring in childhood and adolescence (F90 - F98)	3	0.0
Disorders of sclera, cornea, iris and ciliary body (H15 - H22)	3	0.0
Disorders of lens (H25 - H28)	3	0.0
Glaucoma (H40 - H42)	3	0.0
Disorders of vitreous body and globe (H43 - H45)	3	0.0
Other disorders of the musculoskeletal system and connective tissue (M95 - M99)	3	0.0
Disorders of choroid and retina (H30 - H36)	2	0.0
Disorders of optic nerve and visual pathways (H46 - H48)	2	0.0
Disorders of ocular muscles, binocular movement, accommodation and refraction (H49 - H52)	2	0.0
Other disorders of ear (H90 - H95)	2	0.0
Disorders of skin appendages (L60 - L75)	2	0.0
Other diseases caused by chlamydiae (A70 - A74)	1	0.0
Other disorders of eye and adnexa (H55 - H59)	1	0.0
Mental retardation (F70 - F79)	0	0.0
Disorders of conjunctiva (H10 - H13)	0	0.0
Diseases of inner ear (H80 - H83)	0	0.0
Other disorders of the genito-urinary system (N99)	0	0.0
Delivery (O80 - O84)	0	0.0

APPENDIX E: All underlying causes of death, 1997-2003, by single years

2001	No. of deaths	%
All causes	451,936	100.0
Tuberculosis (A15 - A19)	50,872	11.3
Ill-defined and unknown causes of mortality (R95 - R99)	48,757	10.8
Events of undetermined intent (Y10 - Y34)	34,813	7.7
Influenza and pneumonia (J10 - J18)	31,495	7.0
Other forms of heart disease (I30 - I52)	22,602	5.0
Cerebrovascular diseases (I60 - I69)	22,577	5.0
Intestinal infectious diseases (A00 - A09)	16,060	3.6
Chronic lower respiratory diseases (J40 - J47)	14,681	3.2
Diabetes mellitus (E10 - E14)	14,557	3.2
Ischaemic heart diseases (I20 - I25)	11,777	2.6
Certain disorders involving the immune mechanism (D80 - D89)	11,670	2.6
Hypertensive diseases (I10 - I15)	10,748	2.4
Respiratory and cardiovascular disorders specific to the perinatal period (P20 - P29)	9,497	2.1
Malignant neoplasms of digestive organs (C15 - C26)	9,378	2.1
Human immunodeficiency virus [HIV] diseases (B20 - B24)	9,212	2.0
General symptoms and signs (R50 - R69)	5,909	1.3
Digestive system disorders of foetus and newborn (P75 - P78)	5,540	1.2
Diseases of liver (K70 - K77)	5,058	1.1
Other external causes of accidental injury (W00 - X59)	4,950	1.1
Malignant neoplasms of respiratory and intrathoracic organs (C30 - C39)	4,909	1.1
Renal failure (N17 - N19)	4,849	1.1
Other viral diseases (B25 - B34)	4,809	1.1
Transport accidents (V01 - V99)	4,445	1.0
Inflammatory diseases of the central nervous system (G00 - G09)	4,167	0.9
Assault (X85 - Y09)	3,763	0.8
Other disorders originating in the perinatal period (P90 - P96)	3,460	0.8
Episodic and paroxysmal disorders (G40 - G47)	3,279	0.7
Malignant neoplasms of female genital organs (C51 - C58)	3,244	0.7
Other bacterial diseases (A30 - A49)	3,201	0.7
Other diseases of the respiratory system (J90 - J94)	3,141	0.7
Protozoal diseases (B50 - B64)	2,885	0.6
Metabolic disorders (E70 - E88)	2,619	0.6
Malignant neoplasms of ill-defined, secondary and unspecified sites (C76 - C80)	2,569	0.6
Noninfective enteritis and colitis (K50 - K52)	2,459	0.5
Diseases of oesophagus, stomach and duodenum (K20 - K31)	2,380	0.5
Pulmonary heart disease and diseases of pulmonary circulation (I26 - I28)	2,359	0.5
Other acute lower respiratory infections (J20 - J22)	2,281	0.5
Malnutrition (E40 - E46)	2,190	0.5
Malignant neoplasms of breast (C50)	2,189	0.5
Aplastic and other anaemias (D60 - D64)	2,173	0.5
Other respiratory diseases principal affecting the interstitium (J80 - J84)	1,968	0.4
Malignant neoplasms of male genital organs (C60 - C63)	1,864	0.4
Malignant neoplasms of lymphoid, haematopoietic and related tissue (C81 - C96)	1,848	0.4
Infections specific to the perinatal period (P35 - P39)	1,640	0.4
Complications of medical and surgical care (Y40 - Y84)	1,596	0.4
Diseases of arteries, arterioles and capillaries (I70 - I79)	1,592	0.4
Disorders related to length of gestation and foetal growth (P05 - P08)	1,430	0.3
Mycoses (B35 - B49)	1,354	0.3
Other diseases of intestines (K55 - K63)	1,153	0.3
Malignant neoplasms of lip, oral cavity and pharynx (C00 - C14)	1,045	0.2
Arthropathies (M00 - M25)	910	0.2
Symptoms and signs involving the circulatory and respiratory systems (R00 - R09)	875	0.2
Malignant neoplasms of mesothelial and soft tissue (C45 - C49)	856	0.2
Lung diseases due to external agents (J60 - J70)	829	0.2
Organic, including symptomatic, mental disorders (F00 - F09)	827	0.2
Disorder of gallbladder, biliary tract and pancreas (K80 - K87)	813	0.2
Cerebral palsy and other paralytic syndromes (G80 - G83)	807	0.2
Neoplasms of uncertain or unknown behaviour (D37 - D48)	805	0.2
Other disorders of glucoses regulation and pancreatic internal secretion (E15 - E16)	771	0.2
Other diseases of digestive system (K90 - K93)	733	0.2
Malignant neoplasms of urinary tract (C64 - C68)	717	0.2
Foetus and newborn affected by maternal factors and by complications of pregnancy, labour and delivery (P00 - P04)	698	0.2
Haemorrhagic and haematological disorders of foetus and newborn (P50 - P61)	692	0.2
Other disorders of the nervous system (G90 - G98)	690	0.2
Other degenerative diseases of the nervous system (G30 - G32)	618	0.1

APPENDIX E: All underlying causes of death, 1997-2003, by single years

2001 (continued)	No. of deaths	%
Other disorders of the skin and subcutaneous (L80 - L99)	599	0.1
Chronic rheumatic heart diseases (I05 - I09)	585	0.1
Transitory endocrine and metabolic disorders specific to foetus and newborn (P70 - P74)	568	0.1
Other diseases of pleura (J90 - J94)	539	0.1
Congenital malformations of the circulatory system (Q20 - Q28)	529	0.1
Symptoms and signs involving digestive system and abdomen (R10 - R19)	521	0.1
Diseases of veins, lymphatic vessels and lymph nodes not elsewhere classified (I80 - I89)	494	0.1
Mental and behavioural disorders due to psychoactive substance use (F10 - F19)	460	0.1
Malignant neoplasms of independent (primary) multiple sites (C97)	453	0.1
Suppurative and necrotic conditions of lower respiratory tract (J85 - J86)	447	0.1
Melanoma and other malignant neoplasms of skin (C43 - C44)	447	0.1
Infections of the skin and subcutaneous tissue (L00 - L08)	440	0.1
Intentional self-harm (X60 - X84)	386	0.1
Malignant neoplasms of eye, brain and other parts of central nervous system (C69 - C72)	377	0.1
Congenital malformations of the nervous system (Q00 - Q07)	367	0.1
Sequelae of infectious and parasitic diseases (B90 - B94)	351	0.1
Renal tubulo-interstitial diseases (N10 - N16)	332	0.1
Soft tissue disorders (M60 - M79)	321	0.1
Extrapyramidal and movement disorders (G20 - G26)	316	0.1
Glomerular diseases (N00 - N08)	302	0.1
Diseases of peritoneum (K65 - K67)	301	0.1
Systemic connective tissue disorders (M30 - M36)	282	0.1
Viral hepatitis (B15 - B19)	278	0.1
Other diseases of urinary system (N30 - N39)	275	0.1
Diseases of male genital organs (N40 - N51)	241	0.1
Inflammatory diseases of female pelvic organs (N70 - N77)	231	0.1
Coagulation defects, purpura and other haemorrhagic conditions (D65 - D69)	230	0.1
Schizophrenia, schizotypal and delusional disorders (F20 - F29)	230	0.1
Obesity and other hyperalimentation (E65 - E68)	222	0.0
Oedema, proteinuria and hypertensive disorders in pregnancy, childbirth and puerperium (O10 - O16)	215	0.0
Viral infections of central nervous system (A80 - A89)	212	0.0
Other congenital malformations (Q80 - Q89)	206	0.0
Viral infections characterised by skin and mucous membrane lesions (B00 - B09)	200	0.0
Acute upper respiratory infections (J00 - J06)	190	0.0
Other infectious diseases (B99)	187	0.0
Disorders of thyroid gland (E00 - E07)	179	0.0
Chromosomal abnormalities not elsewhere classified (Q90 - Q99)	178	0.0
Malignant neoplasms of bone and articular cartilage (C40 - C41)	176	0.0
Benign neoplasms (D10 - D36)	172	0.0
Complication predominantly related to the puerperium (O85 - O92)	168	0.0
Hernia (K40 - K46)	164	0.0
Sequelae of external causes of morbidity and mortality (Y85 - Y89)	164	0.0
Systemic atrophies primarily affecting the central nervous system (G10 - G13)	161	0.0
Other congenital malformation of the digestive system (Q38 - Q45)	158	0.0
Nutritional anaemias (D50 - D53)	148	0.0
Complication of labour and delivery (O60 - O75)	148	0.0
Infectious with predominantly sexual mode of transmission (A50 - A64)	141	0.0
Pregnancy with abortive outcome (O00 - O08)	141	0.0
Malignant neoplasms of thyroid and other endocrine glands (C73 - C75)	136	0.0
Osteopathies and chondropathies (M80 - M94)	123	0.0
Condition involving the integument and temperature regulation of foetus and newborn (P80 - P83)	119	0.0
Other nutritional deficiencies (E50 - E64)	118	0.0
Diseases of appendix (K35 - K38)	118	0.0
Helminthiases (B65 - B83)	115	0.0
Other disorders of kidney and ureter (N25 - N29)	113	0.0
Other obstetric conditions not elsewhere classified (O95 - O99)	105	0.0
Polyneuropathies and other disorders of the peripheral nervous system (G60 - G64)	99	0.0
Other diseases of upper respiratory tract (J30 - J39)	98	0.0
Dorsopathies (M40 - M54)	96	0.0
Diseases of myoneural junction and muscle (G70 - G73)	92	0.0
Diseases of middle ear and mastoid (H65 - H75)	87	0.0
Noninflammatory disorders of female genital tract (N80 - N98)	81	0.0
Other and unspecified disorders of the circulatory system (I95 - I99)	76	0.0
Congenital malformations of the respiratory system (Q30 - Q34)	75	0.0
Diseases of oral cavity, salivary glands and jaws (K00 - K14)	69	0.0

APPENDIX E: All underlying causes of death, 1997-2003, by single years

2001 (concluded)	No. of deaths	%
Congenital malformation of urinary system (Q60 - Q64)	69	0.0
Demyelinating diseases of the of the central nervous system (G35 - G37)	63	0.0

Metabolic disorders (E70 - E88)	3,033	0.6
Other acute lower respiratory infections (J20 - J22)	2,982	0.6
Noninfective enteritis and colitis (K50 - K52)	2,976	0.6
Pulmonary heart disease and diseases of pulmonary circulation (I26 - I28)	2,616	0.5
Aplastic and other anaemias (D60 - D64)	2,598	0.5
Malnutrition (E40 - E46)	2,381	0.5
Diseases of oesophagus, stomach and duodenum (K20 - K31)	2,373	0.5
Assault (X85 - Y09)	2,152	0.4
Malignant neoplasms of breast (C50)	2,115	0.4
Disorders related to length of gestation and foetal growth (P05 - P08)	2,004	0.4
Malignant neoplasms of lymphoid, haematopoietic and related tissue (C81 - C96)	1,980	0.4
Malignant neoplasms of male genital organs (C60 - C63)	1,901	0.4
Complications of medical and surgical care (Y40 - Y84)	1,850	0.4
Infections specific to the perinatal period (P35 - P39)	1,754	0.4
Mycoses (B35 - B49)	1,745	0.3
Other respiratory diseases principal affecting the interstitium (J80 - J84)	1,728	0.3
Symptoms and signs involving the circulatory and respiratory systems (R00 - R09)	1,576	0.3
Diseases of arteries, arterioles and capillaries (I70 - I79)	1,565	0.3
Other diseases of intestines (K55 - K63)	1,222	0.2
Foetus and newborn affected by maternal factors and by complications of pregnancy, labour and delivery (P00 - P04)	1,101	0.2
Malignant neoplasms of lip, oral cavity and pharynx (C00 - C14)	1,050	0.2
Arthropathies (M00 - M25)	977	0.2
Organic, including symptomatic, mental disorders (F00 - F09)	948	0.2
Other disorders of glucoses regulation and pancreatic internal secretion (E15 - E16)	941	0.2
Symptoms and signs involving digestive system and abdomen (R10 - R19)	905	0.2
Neoplasms of uncertain or unknown behaviour (D37 - D48)	902	0.2
Cerebral palsy and other paralytic syndromes (G80 - G83)	857	0.2
Malignant neoplasms of mesothelial and soft tissue (C45 - C49)	853	0.2
Lung diseases due to external agents (J60 - J70)	849	0.2
Disorder of gallbladder, biliary tract and pancreas (K80 - K87)	801	0.2
Other diseases of digestive system (K90 - K93)	770	0.2
Other disorder of the nervous system (G90 - G98)	767	0.2
Sequelae of infectious and parasitic diseases (B90 - B94)	747	0.1
Malignant neoplasms of urinary tract (C64 - C68)	718	0.1
Other disorders of the skin and subcutaneous (L80 - L99)	707	0.1

APPENDIX E: All underlying causes of death, 1997-2003, by single years

2002 (continued)	No. of deaths	%
Malignant neoplasms of independent (primary) multiple sites (C97)	703	0.1
Haemorrhagic and haematological disorders of foetus and newborn (P50 - P61)	671	0.1
Unspecified/ Not yet resolved	633	0.1
Diseases of veins, lymphatic vessels and lymph nodes, not elsewhere classified (I80 - I89)	616	0.1
Other diseases of pleura (J90 - J94)	605	0.1
Other degenerative diseases of the nervous system (G30 - G32)	594	0.1
Transitory endocrine and metabolic disorders specific to foetus and newborn (P70 - P74)	593	0.1
Chronic rheumatic heart diseases (I05 - I09)	532	0.1
Congenital malformations of the circulatory system (Q20 - Q28)	527	0.1
Infections of the skin and subcutaneous tissue (L00 - L08)	525	0.1
Mental and behavioural disorders due to psychoactive substance use (F10 - F19)	496	0.1
Malignant neoplasms of eye, brain and other parts of central nervous system (C69 - C72)	431	0.1
Renal tubulo-interstitial diseases (N10 - N16)	406	0.1
Diseases of peritoneum (K65 - K67)	384	0.1
Melanoma and other malignant neoplasms of skin (C43 - C44)	384	0.1
Suppurative and necrotic conditions of lower respiratory tract (J85 - J86)	374	0.1
Congenital malformations of the nervous system (Q00 - Q07)	364	0.1
Extrapyramidal and movement disorders (G20 - G26)	339	0.1
Glomerular diseases (N00 - N08)	337	0.1
Other diseases of urinary system (N30 - N39)	320	0.1
Soft tissue disorders (M60 - M79)	312	0.1

Disorders of psychological development (F80 - F89)	6	0.0
Disorders of eyelid, lacrimal system and orbit (H00 - H06)	6	0.0
Congenital malformations of eye, ear, face and neck (Q10 - Q18)	6	0.0
Rickettsioses (A75 - A79)	5	0.0
Disorders of sclera, cornea, iris and ciliary body (H15 - H22)	5	0.0
Congenital malformation of genital organs (Q50 - Q56)	5	0.0
Radiation-related disorders of the skin and subcutaneous tissue (L55 - L59)	3	0.0
Abnormal findings on examination of urine without diagnosis (R80 - R82)	3	0.0
Behavioural and emotional disorders with onset usually occurring in childhood and adolescence (F90 - F98)	2	0.0
Disorders of optic nerve and visual pathways (H46 - H48)	2	0.0
Diseases of external ear (H60 - H62)	2	0.0
Disorders of skin appendages (L60 - L75)	2	0.0
Other diseases caused by chlamydiae (A70 - A74)	1	0.0
Glaucoma (H40 - H42)	1	0.0
Disorders of vitreous body and globe (H43 - H45)	1	0.0
Disorders of ocular muscles, binocular movement, accommodation and refraction (H49 - H52)	1	0.0
Other disorders of eye and adnexa (H55 - H59)	1	0.0
Other disorders of ear (H90 - H95)	1	0.0
Mental retardation (F70 - F79)	0	0.0
Disorders of conjunctiva (H10 - H13)	0	0.0
Disorders of lens (H25 - H28)	0	0.0
Disorders of choroid and retina (H30 - H36)	0	0.0
Diseases of inner ear (H80 - H83)	0	0.0
Other disorders of the genito-urinary system (N99)	0	0.0
Delivery (O80 - O84)	0	0.0

APPENDIX E: All underlying causes of death, 1997-2003, by single years

2003	%
All causes	100.0
Tuberculosis (A15 - A19)	12.1
Ill-defined and unknown causes of mortality (R95 - R99)	10.6
Influenza and pneumonia (J10 - J18)	8.3
Events of undetermined intent (Y10 - Y34)	7.0
Cerebrovascular diseases (I60 - I69)	5.0
Other forms of heart disease (I30 - I52)	4.4
Intestinal infectious diseases (A00 - A09)	4.4
Diabetes mellitus (E10 - E14)	3.1
Chronic lower respiratory diseases (J40 - J47)	3.0
Certain disorders involving the immune mechanism (D80 - D89)	2.7
Ischaemic heart diseases (I20 - I25)	2.5
Respiratory and cardiovascular disorders specific to the perinatal period (P20 - P29)	2.3
Hypertensive diseases (I10 - I15)	2.2
Human immunodeficiency virus [HIV] diseases (B20 - B24)	2.1
Malignant neoplasms of digestive organs (C15 - C26)	1.7
Other viral diseases (B25 - B34)	1.4
Digestive system disorders of foetus and newborn (P75 - P78)	1.4
General symptoms and signs (R50 - R69)	1.2
Inflammatory diseases of the central nervous system (G00 - G09)	1.2
Renal failure (N17 - N19)	1.1
Diseases of liver (K70 - K77)	0.9
Malignant neoplasms of respiratory and intrathoracic organs (C30 - C39)	0.9
Other acute lower respiratory infections (J20 - J22)	0.8
Other diseases of the respiratory system (J90 - J94)	0.8
Other disorders originating in the perinatal period (P90 - P96)	0.8
Transport accidents (V01 - V99)	0.8
Other bacterial diseases (A30 - A49)	0.7
Other external causes of accidental injury (W00 - X59)	0.7
Protozoal diseases (B50 - B64)	0.7
Episodic and paroxysmal disorders (G40 - G47)	0.7
Malignant neoplasms of female genital organs (C51 - C58)	0.6
Malignant neoplasms of ill-defined, secondary and unspecified sites (C76 - C80)	0.6
Metabolic disorders (E70 - E88)	0.6
Noninfective enteritis and colitis (K50 - K52)	0.6
Aplastic and other anaemias (D60 - D64)	0.5
Pulmonary heart disease and diseases of pulmonary circulation (I26 - I28)	0.5
Diseases of oesophagus, stomach and duodenum (K20 - K31)	0.5
Malnutrition (E40 - E46)	0.4
Symptoms and signs involving the circulatory and respiratory systems (R00 - R09)	0.4
Malignant neoplasms of breast (C50)	0.4
Malignant neoplasms of male genital organs (C60 - C63)	0.4
Malignant neoplasms of lymphoid, haematopoietic and related tissue (C81 - C96)	0.4
Infections specific to the perinatal period (P35 - P39)	0.4
Disorders related to length of gestation and foetal growth (P05 - P08)	0.4
Mycoses (B35 - B49)	0.4
Complications of medical and surgical care (Y40 - Y84)	0.4
Diseases of arteries, arterioles and capillaries (I70 - I79)	0.3

Other spirochactal diseases (A65 - A69)	0.0
Rickettsioses (A75 - A79)	0.0
Behavioural and emotional disorders with onset usually occurring in childhood and adolescence (F90 - F98)	0.0
Disorders of eyelid, lacrimal system and orbit (H00 - H06)	0.0
Disorders of sclera, cornea, iris and ciliary body (H15 - H22)	0.0
Disorders of choroid and retina (H30 - H36)	0.0
Disorders of ocular muscles, binocular movement, accommodation and refraction (H49 - H52)	0.0
Other disorders of ear (H90 - H95)	0.0
Radiation-related disorders of the skin and subcutaneous tissue (L55 - L59)	0.0
Other disorders of the musculoskeletal system and connective tissue (M95 - M99)	0.0
Abnormal findings on examination of urine without diagnosis (R80 - R82)	0.0
Glaucoma (H40 - H42)	0.0
Diseases of external ear (H60 - H62)	0.0
Other diseases caused by chlamydiae (A70 - A74)	0.0
Disorders of lens (H25 - H28)	0.0
Disorders of vitreous body and globe (H43 - H45)	0.0
Disorders of optic nerve and visual pathways (H46 - H48)	0.0
Other disorders of eye and adnexa (H55 - H59)	0.0
Diseases of inner ear (H80 - H83)	0.0
Unspecified/ Not yet resolved	0.0
Mental retardation (F70 - F79)	0.0
Disorders of conjunctiva (H10 - H13)	0.0
Other disorders of the genito-urinary system (N99)	0.0
Delivery (O80 - O84)	0.0

APPENDIX F: Detailed description of the broad groups of natural causes of death which were among the ten leading causes in 1997, 1999 and 2001

	No. of deaths			%		
	1997	1999	2001	1997	1999	2001
Intestinal infectious diseases (A00 - A09)						
A00 Cholera	3	8	372	0.0	0.1	2.3
A01 Typhoid and paratyphoid fevers	126	98	86	1.9	0.9	0.5
A02 Other salmonella infections	12	28	28	0.2	0.3	0.2
A03 Shigellosis	36	22	21	0.6	0.2	0.1
A04 Other bacterial intestinal infections	16	9	8	0.2	0.1	0.0
A05 Other bacterial foodborne intoxications	5	5	1	0.1	0.0	0.0
A06 Amoebiasis	73	116	44	1.1	1.0	0.3
A07 Other protozoal intestinal diseases	4	10	14	0.1	0.1	0.1
A08 Viral and other specified intestinal infections	11	25	31	0.2	0.2	0.2
A09 Diarrhoea and gastroenteritis of presumed infectious origin	6,236	10,834	15,455	95.6	97.1	96.2
Total	6,522	11,155	16,060	100.0	100.0	100.0
Tuberculosis (A15 - A19)						
A16 Respiratory tuberculosis, not confirmed bacteriologically or histologically	20,364	31,513	46,368	92.5	92.2	91.1
A17 Tuberculosis of nervous system	645	1,006	1,740	2.9	2.9	3.4
A18 Tuberculosis of other organs	377	538	892	1.7	1.6	1.8
A19 Miliary tuberculosis	635	1,116	1,872	2.9	3.3	3.7
Total	22,021	34,173	50,872	100.0	100.0	100.0
Human immunodeficiency virus [HIV] diseases (B20 - B24)						
B20 Human immunodeficiency virus (HIV) disease resulting in infectious and parasitic diseases	4,332	7,167	6,280	69.5	72.2	68.2
B21 Human immunodeficiency virus (HIV) disease resulting in malignant neoplasms	95	107	122	1.5	1.1	1.3
B22 Human immunodeficiency virus (HIV) disease resulting in other specified diseases	328	497	436	5.3	5.0	4.7
B23 Human immunodeficiency virus (HIV) disease resulting in other conditions	654	864	650	10.5	8.7	7.1
B24 Unspecified human immunodeficiency virus (HIV) disease	825	1,290	1,724	13.2	13.0	18.7
Total	6,234	9,925	9,212	100.0	100.0	100.0
Malignant neoplasms of digestive organs (C15 - C26)						
C15 Malignant neoplasm of oesophagus	3,409	3,429	3,411	38.2	36.6	36.4
C16 Malignant neoplasm of stomach	1,351	1,420	1,343	15.2	15.2	14.3
C17 Malignant neoplasm of small intestine	28	19	23	0.3	0.2	0.2
C18 Malignant neoplasm of colon	1,086	1,197	1,203	12.2	12.8	12.8
C19 Malignant neoplasm of rectosigmoid junction	23	37	38	0.3	0.4	0.4
C20 Malignant neoplasm of rectum	318	331	350	3.6	3.5	3.7
C21 Malignant neoplasm of anus and anal canal	28	27	40	0.3	0.3	0.4
C22 Malignant neoplasm of liver and intrahepatic bile ducts	1,556	1,596	1,609	17.5	17.0	17.2
C23 Malignant neoplasm of gallbladder	66	82	69	0.7	0.9	0.7
C24 Malignant neoplasm of other and unspecified parts of biliary tract	33	53	37	0.4	0.6	0.4
C25 Malignant neoplasm of pancreas	825	945	1,056	9.3	10.1	11.3
C26 Malignant neoplasm of other and ill-defined digestive organs	191	231	199	2.1	2.5	2.1
Total	8,914	9,367	9,378	100.0	100.0	100.0

APPENDIX F: Detailed description of the broad groups of natural causes of death which were among the ten leading causes in 1997, 1999 and 2001 (continued)

	No. of deaths			%		
	1997	1999	2001	1997	1999	2001
Certain disorders involving the immune mechanism (D80 - 89)						
D80 Immunodeficiency with predominantly antibody defects	3	3	4	0.1	0.0	0.0
D81 Combined immunodeficiencies	1	6	1	0.0	0.1	0.0
D82 Immunodeficiency associated with other major defects	2	6	0	0.1	0.1	0.0
D83 Common variable immunodeficiency	49	15	65	1.5	0.2	0.6
D84 Other immunodeficiencies	3,205	8,515	11,554	97.2	99.1	99.0
D86 Sarcoidosis	25	26	29	0.8	0.3	0.2

Appendix H

Population group differences

Readers are reminded that the population group breakdowns may not be very reliable, as large proportions of death notification forms did not specify population group (see Table 3.1). For this reason the underlying causes of death presented in this Appendix focus on data pertaining to 1999 and 2001. The data for 1997 have been excluded due to the fact that about 83% of the forms for that year had no information on population group. However, the underlying causes for cases where population group was not specified have also been ranked for the two years given.

Table H1 gives a list of the ten leading natural underlying causes of death for the various population groups in 1999 and 2001. The following profiles emerge:

Influenza and pneumonia, cerebrovascular diseases, diabetes, other forms of heart disease, chronic lower respiratory diseases and hypertensive diseases were amongst the ten leading causes of death for all population groups. *Tuberculosis* was the leading cause of death as far as Africans, coloureds and Indians were concerned. *Ischaemic heart diseases, malignant neoplasms of respiratory and intrathoracic organs and malignant neoplasms of digestive organs* were leading causes for coloureds, whites and Indians. The ranking of the above diseases within each population group remained almost the same for the two years.

Intestinal infectious diseases and human immunodeficiency virus (HIV) diseases as leading causes were exclusive to the African population group. *Renal failure* emerged as a leading cause of death for whites and Indians in 2001.

Appendix H: Table H1: Ten leading natural causes of death within population group: 1999 and 2001

Broad group of causes of death	African			Coloured			Indian			White			Unspecified
