## 1. Introduction

The Quarterly Labour Force Survey (QLFS) is a household-based sample survey conducted by Statistics South Africa (Stats SA). It collects data on the labour market activities of individuals aged 15 years and older who live in South Africa. However, this report only covers labour market activities of persons aged 15–64 years.

This report presents the key findings of the QLFS conducted from January to March 2019 (Q1: 2019).

## 2. Highlights of the results

**Table A: Key labour market indicators**

*Due to rounding, numbers do not necessarily add up to totals.*

The working-age population increased by 149 000 or 0,4% in the first quarter of 2019 compared to the fourth quarter of the previous year. Compared to Q1: 2018, the working-age population increased by 605 000 or 1,6%. The number of employed persons decreased by 237 000 to 16,3 million in Q1: 2019, while the number of unemployed persons increased by 62 000 to 6,2 million compared to Q4: 2018, resulting in a decrease of 176 000 (down by 0,8%) in the number of people in the labour force. The absorption rate decreased by 0,7 of a percentage point to 42,6% and the unemployment rate increased by 0,5 of a percentage point to 27,6% compared to the fourth quarter of 2018.

Employment decreased in all four of the sectors in Q1: 2019; with the Formal sector recording the largest employment losses of 126 000, followed by the Informal sector (68 000), Private households (31 000) and Agriculture (12 000). The number of discouraged work-seekers and the number of people who were not economically active for reasons other than discouragement increased by 156 000 and 169 000, respectively, between the fourth quarter of 2018 and the first quarter of 2019, resulting in a net increase of 325 000 in the not economically active population.

Compared to a year ago, employment decreased by 0,5% (86 000), while unemployment increased by 3,7% (220 000). The number of persons who were not economically active increased by 3,1% (470 000).

### 3. Employment

**Figure 1: Quarter-to-quarter changes in employment, Q1: 2013 to Q1: 2019**

Based on Figure 1 above, employment decreased for the first time in quarter one since 2016, after experiencing growth in the past consecutive first quarters of 2017 and 2018. The largest first quarter decrease in the number of employed persons was observed in Q1: 2016 (down by 344 000). Compared to the fourth quarter of 2018, the number of employed persons decreased by 237 000 persons in Q1: 2019.

**Table B: Employment by industry**

Industry	Jan-Mar 2018	Oct-Dec 2018	Jan-Mar 2019	Qtr-to-qtr change	Year-on-year change	Qtr-to-qtr change	Year-on-year change
	Thousand			Per cent			
<b>Total*</b>	<b>16 378</b>	<b>16 529</b>	<b>16 291</b>	<b>-237</b>	<b>-86</b>	<b>-1,4</b>	<b>-0,5</b>
Agriculture	847	849	837	-12	-9	-1,4	-1,1
Mining	397	438	417	-20	20	-4,6	5,2
Manufacturing	1 849	1 766	1 780	14	-69	0,8	-3,7
Utilities	143	134	150	16	7	12,1	4,7
Construction	1 431	1 481	1 339	-142	-92	-9,6	-6,4
Trade	3 276	3 320	3 345	25	69	0,8	2,1

Community and social services	3 785	3 624	3 574	-50	-211	-1,4	-5,6
Private households	1 275	1 332	1 301	-31	26	-2,3	2,0

\*Note: Total includes 'Other' industries.

Due to rounding, numbers do not necessarily add up to totals.

Note: Utilities refers to Electricity, gas and water supply.

Trade refers to Wholesale and retail trade; repair of motor vehicles, motor cycles and personal and household goods; hotels and restaurants.

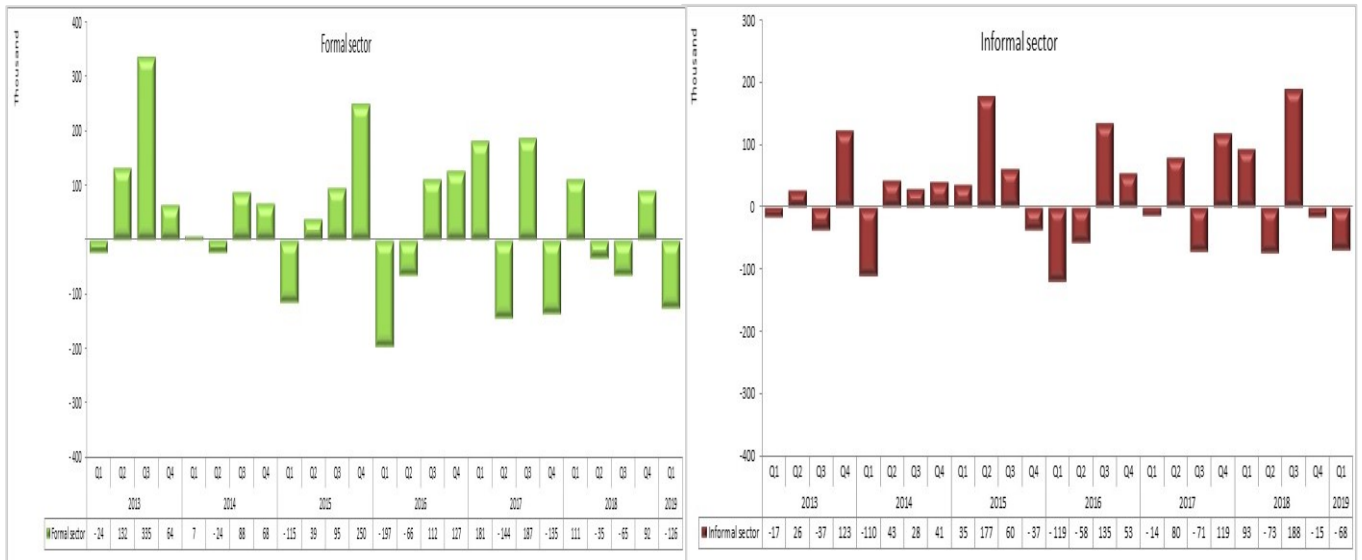

Finance refers to Financial intermediation, insurance, real estate and business services.

Table B shows that between Q4: 2018 and Q1: 2019, the number of employed persons decreased in six of the ten industries; with the largest decreases recorded in Construction (142 000), Finance and other business services (94 000), Community and social services (50 000) and Private households (31 000). However, employment gains were recorded in Transport (59 000), Trade (25 000), Utilities (16 000) and Manufacturing (14 000).

Compared to the same period last year, employment losses of 86 000 persons were largely driven by Community and social services (211 000), Construction (92 000), Manufacturing (69 000) and Agriculture (9 000) in Q1: 2019. Meanwhile, Finance and other business services had the largest gain of 114 000 during the same period.

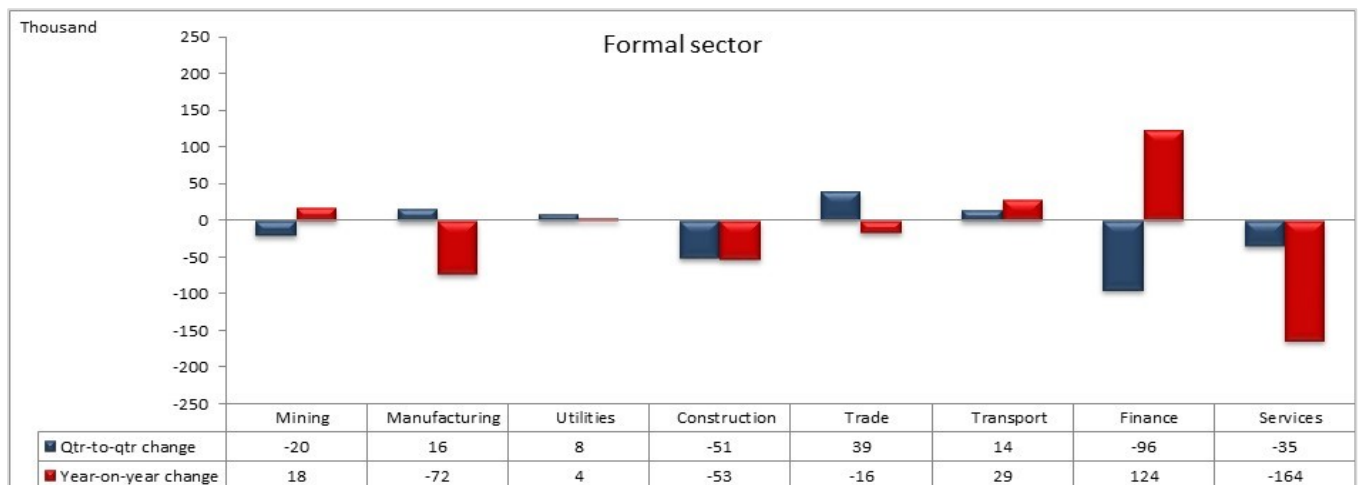

**Figure 2a: Quarter-to-quarter employment changes in the formal sector, Q1: 2013 to Q1: 2019**

**Figure 2b: Quarter-to-quarter employment changes in the informal sector, Q1: 2013 to Q1: 2019**

Following an increase in formal sector employment in Q4: 2018 (92 000), employment declined by 126 000 in Q1: 2019 in this sector. The informal sector also recorded a decline of 68 000 jobs in Q1: 2019 compared to Q4: 2018.

**Figure 3: Quarter-to-quarter and year-on-year changes in the formal sector by industry**

*Note: Utilities refers to Electricity, gas and water supply.  
 Trade refers to Wholesale and retail trade; repair of motor vehicles, motor cycles and personal and household goods; hotels and restaurants.  
 Finance refers to Financial intermediation, insurance, real estate and business services.  
 Services refers to Community, personal and social services.*

The formal sector quarterly employment loss of 126 000 jobs was mainly driven by Finance and other business services (96 000), Construction (51 000), Community and social services (35 000) and Mining (20 000) in Q1: 2019. Trade

recorded the largest employment gains of 39 000, followed by Manufacturing (16 000) and Transport (14 000) in the same period.

When comparing the current employment in the formal sector with the same period last year, the loss of 135 000 jobs was mainly driven by Community and social services (164 000), Manufacturing (72 000), Construction (53 000) and Trade (16 000). Formal sector employment in other industries increased with Finance and other business services recording the largest gains of 124 000, while Transport and Mining gained 29 000 and 18 000 jobs, respectively.

**Figure 4: Quarter-to-quarter and year-on-year changes in the informal sector by industry**

In the first quarter of 2019, the informal sector decreased by 68 000 persons compared to the fourth quarter of 2018. The decline in informal sector employment was mainly driven by the Construction (91 000), Community and social services (15 000) and Trade (14 000) industries. Employment gains were only recorded in Transport (45 000) while Finance and other business services remained virtually unchanged (1 000).

Compared to Q1: 2018, employment in the informal sector increased in five industries. Annual employment gains were recorded in the Trade (85 000), Transport (35 000), Manufacturing and Utilities (with 3 000 each) and Mining (2 000) industries. On the other hand, the largest employment losses were recorded in the Community and social services (47 000), Construction (39 000) and Finance and other business services (10 000) industries.

**Table C: Employment by occupation**

Occupation	Jan-Mar 2018	Oct-Dec 2018	Jan-Mar 2019	Qtr-to-qtr change	Year-on-year change	Qtr-to-qtr change	Year-on-year change
	Thousand			Per cent			
<b>Total</b>	<b>16 378</b>	<b>16 529</b>	<b>16 291</b>	<b>-237</b>	<b>-86</b>	<b>-1,4</b>	<b>-0,5</b>
Manager	1 422	1 444	1 463	19	41	1,3	2,9
Professional	873	878	884	5	11	0,6	1,3
Technician	1 415	1 474	1 448	-26	33	-1,8	2,4
Clerk	1 746	1 704	1 679	-25	-67	-1,5	-3,8
Sales and services	2 692	2 687	2 667	-20	-24	-0,7	-0,9
Skilled agriculture	62	66	47	-19	-15	-28,4	-24,7
Craft and related trade	1 994	2 073	1 972	-101	-22	-4,9	-1,1
Plant and machine operator	1 359	1 394	1 380	-14	21	-1,0	1,6
Elementary	3 823	3 780	3 737	-44	-87	-1,2	-2,3
Domestic worker	991	1 029	1 013	-15	22	-1,5	2,2

\*Note: Total includes 'Other' occupations.  
Due to rounding, numbers do not necessarily add up to totals.

All occupations categories experienced employment decreases in Q1: 2019, with the exception of Manager (up by 19 000) and Professional (up by 5 000) occupations compared to the previous quarter. Craft and related trade (101 000) occupations recorded the largest employment losses, followed by Elementary (44 000), Technician (26 000) and Clerk (25 000) occupations, while Plant and machine operator occupations recorded the lowest decrease of 14 000 jobs.

Year-on-year changes show that losses in employment were mainly driven by Elementary (87 000), Clerk (67 000), Sales and services (24 000), Craft and related trade (22 000) and Skilled agriculture (15 000) occupations. Manager (41 000), Technician (33 000), Domestic worker (22 000), Plant and machine operator (21 000) and Professional (11 000) occupations recorded gains in employment in Q1: 2019 compared to Q1: 2018.

**Table D: Employment by province**

Province	Jan-Mar 2018	Oct-Dec 2018	Jan-Mar 2019	Qtr-to-qtr change	Year-on-year change	Qtr-to-qtr change	Year-on-year change
	Thousand				Per cent		
<b>South Africa</b>	<b>16 378</b>	<b>16 529</b>	<b>16 291</b>	<b>-237</b>	<b>-86</b>	<b>-1,4</b>	<b>-0,5</b>
Western Cape	2 530	2 520	2 520	-1	-10	0,0	-0,4
Eastern Cape	1 397	1 375	1 308	-67	-90	-4,9	-6,4
Northern Cape	321	322	321	-1	0	-0,2	0,0
Free State	814	806	803	-3	-11	-0,4	-1,4
KwaZulu-Natal	2 617	2 648	2 598	-50	-19	-1,9	-0,7
North West	992	973	970	-3	-22	-0,3	-2,2
Gauteng	5 069	5 163	5 162	-2	93	0,0	1,8
Mpumalanga	1 197	1 245	1 209	-36	12	-2,9	1,0
Limpopo	1 441	1 477	1 401	-75	-39	-5,1	-2,7

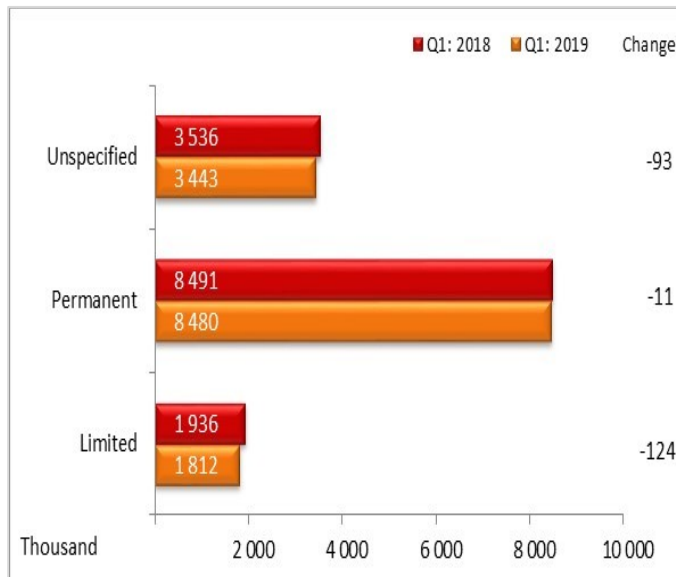

*Due to rounding, numbers do not necessarily add up to totals.*

Table D shows that the number of employed persons decreased in all nine provinces between Q4: 2018 and Q1: 2019. The largest employment decreases were recorded in Limpopo (down by 75 000), Eastern Cape (down by 67 000), KwaZulu-Natal (down by 50 000) and Mpumalanga (down by 36 000).

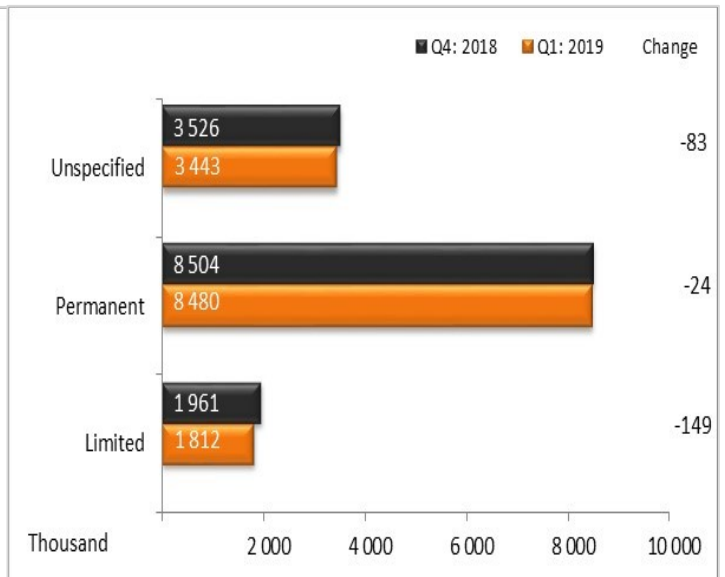

Compared to Q1: 2018, the largest decline in employment was recorded in Eastern Cape (down by 90 000) and Limpopo (down by 39 000). The largest increase in the number of the employed persons was recorded in Gauteng (up by 93 000) and Mpumalanga (up by 12 000), while Northern Cape remained unchanged.

### 3.1 Conditions of employment for employees

**Figure 5: Quarter-to-quarter changes in nature of employment contract**

**Figure 6: Year-on-year changes in nature of employment contract**

Figures 5 and 6 show that the majority of employees had permanent employment contracts. Between the fourth quarter of 2018 and the first quarter of 2019, the number of employees with contracts of a limited duration, unspecified duration and those with contracts of a permanent nature decreased by 149 000, 83 000 and 24 000, respectively.

The year-on-year comparisons indicate that the number of employees decreased irrespective of the nature of their employment contract. The largest decrease was recorded among those with a contract of limited duration (down by 124 000), while the number of employees with contracts of an unspecified duration and those with contracts of a permanent nature declined by 93 000 and 11 000, respectively.

### 4. Unemployment and Not in employment, education or training (NEET)

**Figure 7: Quarter-to-quarter changes in unemployment, Q1: 2013 to Q1: 2019**

After a decrease of 70 000 in the number of unemployed persons in Q4: 2018, the number of unemployed persons increased by 62 000 in Q1: 2019. Notable from the above figure is that the number of unemployed persons has increased in every first quarter of each year since 2013. The largest increase was recorded in Q1: 2015 (up by 626 000), followed by Q1: 2016 (up by 530 000) and Q1: 2017 (up by 433 000).

**Figure 8: Proportion of the unemployed by education level, Q1: 2019**

Figure 8 shows that of the 6,2 million unemployed persons in Q1: 2019, almost 56% had an education level below matric, followed by those with matric at 34,5%. Only 2,1% of the unemployed persons were graduates while 6,9% had other tertiary qualifications as their highest level of education.

**Table E: Unemployment rate by province**

	Official unemployment rate					Expanded unemployment rate				
	Jan-Mar 2018	Oct-Dec 2018	Jan-Mar 2019	Qtr-to-qtr change	Year-on-year change	Jan-Mar 2018	Oct-Dec 2018	Jan-Mar 2019	Qtr-to-qtr change	Year-on-year change
	Per cent			Percentage points		Per cent			Percentage points	
<b>South Africa</b>	<b>26,7</b>	<b>27,1</b>	<b>27,6</b>	<b>0,5</b>	<b>0,9</b>	<b>36,7</b>	<b>37,0</b>	<b>38,0</b>	<b>1,0</b>	<b>1,3</b>
Western Cape	19,7	19,3	19,5	0,2	-0,2	22,5	23,1	22,7	-0,4	0,2
Eastern Cape	35,6	36,1	37,4	1,3	1,8	46,0	46,8	48,3	1,5	2,3
Northern Cape	29,5	25,0	26,0	1,0	-3,5	41,0	38,6	41,5	2,9	0,5
Free State	32,8	32,9	34,9	2,0	2,1	38,4	39,3	40,1	0,8	1,7
KwaZulu-Natal	22,3	25,6	25,1	-0,5	2,8	40,6	41,3	42,4	1,1	1,8
North West	25,8	26,6	26,4	-0,2	0,6	41,8	42,9	44,4	1,5	2,6
Gauteng	28,6	29,0	28,9	-0,1	0,3	33,6	33,6	33,6	0,0	0,0
Mpumalanga	32,4	32,0	34,2	2,2	1,8	42,5	41,1	43,0	1,9	0,5
Limpopo	19,9	16,5	18,5	2,0	-1,4	37,6	38,8	43,1	4,3	5,5

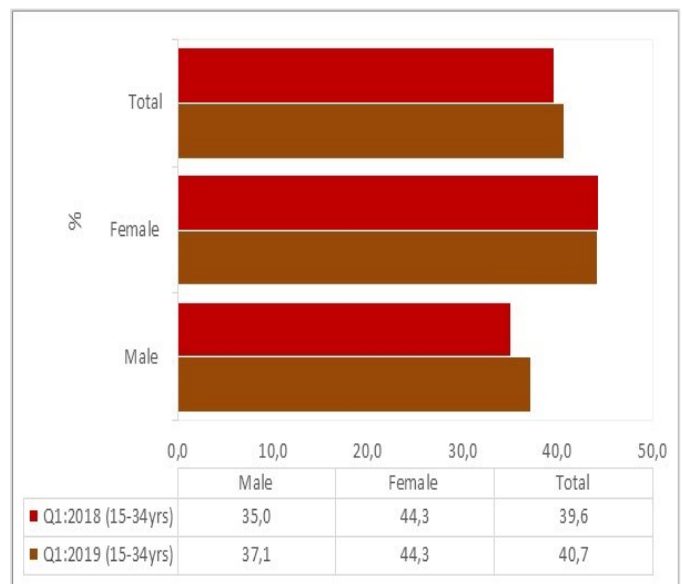

The official unemployment rate increased by 0,5 of a percentage point in Q1: 2019 compared to Q4: 2018. The official unemployment rate increased in six of the nine provinces, with the largest increase in Mpumalanga (up by 2,2 percentage points), Limpopo and Free State (up by 2,0 percentage points each), and Eastern Cape (up by 1,3 percentage points).

KwaZulu-Natal, North West and Gauteng were the only provinces that recorded decreases in the unemployment rate (0,5 of a percentage point, 0,2 of a percentage point and 0,1 of a percentage point, respectively). Year-on-year, the official unemployment rate increased by 0,9 of a percentage point. The official unemployment rate increased in six of the nine provinces; the largest increase was observed in KwaZulu-Natal (up by 2,8 percentage points), followed by Free State (up by 2,1 percentage points), Mpumalanga and Eastern Cape (up by 1,8 percentage points each).

The expanded unemployment rate increased by 1,0 percentage point from 37,0% in Q4: 2018 to 38,0% in Q1: 2019. The largest increase was recorded in Limpopo (up by 4,3 percentage points), followed by Northern Cape and Mpumalanga (up by 2,9 percentage points and 1,9 percentage points, respectively). The expanded unemployment rate for Gauteng remained unchanged, while Western Cape was the only province that experienced a decrease in the expanded unemployment rate (down by 0,4 of a percentage point). Compared to the same period last year, the expanded unemployment rate increased by 1,3 percentage points in Q1: 2019. All provinces recorded an increase in the expanded unemployment rate except for Gauteng where it remained unchanged. The largest increase was recorded in Limpopo (up by 5,5 percentage points), followed by North West and Eastern Cape (up by 2,6 percentage points and 2,3 percentage points, respectively).

**Figure 9a: NEET rates for youth aged 15–24 years by sex**

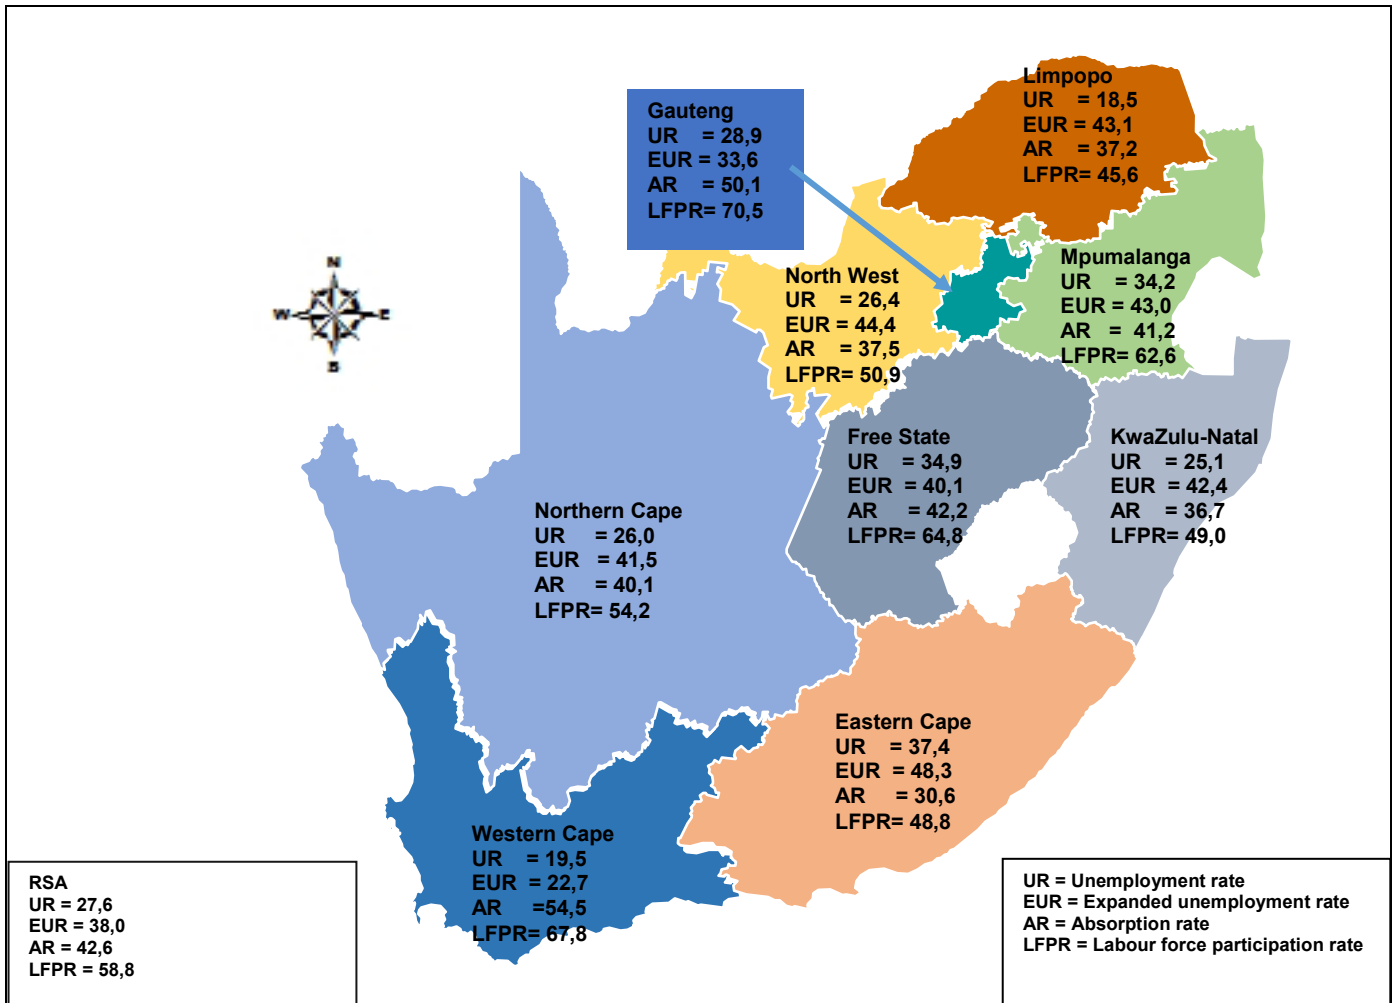

**Figure 9b: NEET rates for youth aged 15–34 years by sex**

The percentage of young persons aged 15–24 years who were not in employment, education or training (NEET) increased from 32,4% in Q1: 2018 to 33,2% in Q1: 2019. In this age group, the NEET rate for males increased by 1,9 percentage points, while the rate for females decreased by 0,2 of a percentage point. The NEET rate for females was higher than that of their male counterparts in both years (Figure 9a).

Compared to Q1: 2018, the percentage of young persons aged 15–34 years who were not in employment, education or training (NEET) increased by 1,0 percentage point from 39,6% to 40,7% in Q1: 2019. The NEET rate for males increased by 2,1 percentage points while for females, the rate remained unchanged in Q1: 2019. In both Q1: 2018 and Q1: 2019, more than four in every ten young females were not in employment, education, or training (Figure 9b).

### 7. Quarterly Labour Force Survey (QLFS) and the Quarterly Employment Survey (QES)

There are two official sources of employment statistics: the QES (which is establishment based) and the QLFS (which is household based). Each survey has its strengths and limitations. For example, the QES cannot provide information on the following:

- Description of the employed, e.g. their demographic profile, education level, hours of work, etc.; and
- Unemployment and descriptors of the unemployed.

The QLFS is a survey of households that collects information from approximately 30 000 dwelling units and collects data on the labour market activities of individuals, whereas the QES is an enterprise-based survey that collects information from non-agricultural businesses and organisations from approximately 20 000 units. The numerous conceptual and methodological differences between the household- and enterprise-based surveys result in important distinctions in the employment estimates derived from the surveys. Among these are:

- The household-based survey includes agricultural workers, self-employed workers whose businesses are unincorporated, unpaid family workers, and private household workers among the employed. These groups are excluded from the enterprise-based survey.
- The household-based survey is limited to workers 15 years of age and older. The enterprise-based survey is not limited by age.
- The household-based survey has no duplication of individuals, because individuals are counted only once, even if they hold more than one job. In the enterprise-based survey, employees working at more than one job and thus appearing on more than one payroll are counted separately for each appearance.
- QLFS includes income tax, VAT and number of employees in determining the formal sector, while QES uses only VAT with annual turnover greater than R300 000.
- QLFS allows for proxy responses (a household member responding on behalf of the other). This can introduce misclassification of items, e.g. formal/informal classification.

**Table F: Key differences between the QLFS and the QES**

	<b>QLFS</b>	<b>QES</b>
<b>Coverage</b>	Private households and workers' hostels Non-institutional population (15 years and older) Total employment (including Informal sector, Private households, Agriculture and small businesses)	Payroll of VAT-registered businesses Employees only Formal sector, excluding Agriculture
<b>Sample size</b>	Quarterly sample of approximately 30 000 dwellings in which households reside	Quarterly sample of 20 000 non-agricultural formal-sector businesses
<b>Reference period</b>	One week prior to the interview	Payroll on the last day of the quarter
<b>Standard Industrial Classification (SIC)</b>	All industries	Excluding Agriculture and Private households
<b>Formal sector definition (excluding Agriculture and Private households)</b>	Employers and own-account workers registered for VAT or income tax Employees paying income tax and those not paying tax but working in firms with five or more workers	Employees on a payroll of VAT-registered businesses

**Figure 15: Formal sector employment trends in QLFS and QES, Q4: 2013 to Q4: 2018**

## 8. Technical notes

<b>Limpopo</b>	<b>97,5</b>

### 8.2 Survey requirements and design

The Quarterly Labour Force Survey (QLFS) uses the Master Sample frame that has been developed as a general-purpose household survey frame that can be used by all other Stats SA household-based surveys having design requirements that are reasonably compatible with the QLFS. The 2013 Master Sample is based on information collected during the 2011 Census conducted by Stats SA. In preparation for Census 2011, the country was divided into 103 576 enumeration areas (EAs). The census EAs, together with the auxiliary information for the EAs, were used as the frame units or building blocks for the formation of primary sampling units (PSUs) for the Master Sample, since they covered the entire country and had other information that is crucial for stratification and creation of PSUs. There are 3 324 primary sampling units (PSUs) in the Master Sample, with an expected sample of approximately 33 000 dwelling units (DUs). The number of PSUs in the current Master Sample (3 324) reflects an 8,0% increase in the size of the Master Sample compared to the previous 2008 Master Sample (which had 3 080 PSUs). The larger Master Sample of PSUs was selected to improve the precision (smaller coefficients of variation, known as CVs) of the QLFS estimates.

The Master Sample is designed to be representative at the provincial level and within provinces at metro/non-metro levels. Within the metros, the sample is further distributed by geographical type. The three geography types are Urban, Tribal and Farms. This implies, for example, that within a metropolitan area the sample is representative of the different geography types that may exist within that metro.

It is divided equally into four subgroups or panels called rotation groups. The rotation groups are designed in such a way that each of these groups has the same distribution pattern as that which is observed in the whole sample. They are numbered from one (1) to four (4), and these numbers also correspond to the quarters of the year in which the sample will be rotated for the particular group.

The sample for the QLFS is based on a stratified two-stage design with probability proportional to size (PPS) sampling of PSUs in the first stage, and sampling of dwelling units (DUs) with systematic sampling in the second stage.

### **8.3 Sample rotation**

For each quarter of the QLFS, a quarter of the sampled dwellings are rotated out of the sample. These dwellings are replaced by new dwellings from the same PSU or the next PSU on the list. Thus, sampled dwellings are expected to remain in the sample for four consecutive quarters. It should be noted that the sampling unit is the dwelling, and the unit of observation is the household. Therefore, if a household moves out of a dwelling after being in the sample for two quarters (as an example) and a new household moves in, the new household will be enumerated for the next two quarters. If no household moves into the sampled dwelling, the dwelling will be classified as vacant (or unoccupied).

### **8.4 Weighting**

The sample weights were constructed in order to account for the following: the original selection probabilities (design weights), adjustments for PSUs that were subsampled or segmented, excluded population from the sampling frame, non-response, weight trimming, and benchmarking to known population estimates from the Demographic Analysis Division within Stats SA.

### **8.5 Non-response adjustment**

In general, imputation is used for item non-response (i.e. blanks within the questionnaire) and edit failures (i.e. invalid or inconsistent responses). The eligible households in the sampled dwellings can be divided into two response categories: respondents and non-respondents. Weight adjustment is applied to account for the non-respondent households (e.g. refusal, no contact, etc.). The adjustment for total non-response was computed at two levels of non-response: PSU non-response and household non-response.

### **8.6 Final survey weights**

In the final step of constructing the sample weights, all individuals within a household are assigned the same adjusted base weight. The adjusted base weights are calibrated such that the aggregate totals will match with independently derived population estimates (from the Stats SA Demographic Analysis Division) for various age, race and gender groups at national level and individual metropolitan and non-metropolitan area levels within the provinces. The calibrated weights are constructed using the constraint that each person within the same household should have the same calibrated weight, with a lower bound on the calibrated weights set at 50.

## 8.7 Estimation

The final survey weights are used to obtain the estimates for various domains of interest, e.g. number of persons employed in Agriculture in Western Cape, the number of females employed in Manufacturing, etc.

## 8.8 Reliability of the survey estimates

Since estimates are based on sample data, they differ from figures that would have been obtained from complete enumeration of the population using the same instrument. Results are subject to both sampling and non-sampling errors. Non-sampling errors include biases from inaccurate reporting, processing, and tabulation, etc., as well as errors from non-responses and incomplete reporting. These types of errors cannot be measured readily. However, to some extent, non-sampling errors can be minimised through the procedures used for data collection, editing, quality control, and non-response adjustment. The variances of the survey estimates are used to measure sampling errors.

### (i) Variance estimation

The most commonly used methods for estimating variances of survey estimates from complex surveys such as the QLFS are the Taylor-series Linearization, Jack-knife Replication, Balanced Repeated Replication (BRR), and Bootstrap methods (Wolter, 2007).<sup>1</sup> The Fay's BRR method has been used for variance estimation in the QLFS because of its simplicity.

### (ii) Coefficient of variation

It is more useful in many situations to assess the size of the standard error relative to the magnitude of the characteristic being measured (the standard error is defined as the square root of the variance). The **coefficient of variation** ( $cv$ ) provides such a measure. It is the **ratio of the standard error of the survey estimate to the value of the estimate itself expressed as a percentage**. It is very useful in comparing the precision of several different survey estimates, where their sizes or scales differ from one another.

### (iii) P-value of an estimate of change

The p-value corresponding to an estimate of change is the probability of observing a value larger than the particular observed value under the hypothesis that there is no real change. If p-value < 0,01, the difference is highly significant; if p-value is between 0,01 and 0,05, the difference is significant; and if p-value > 0,05, the difference is not significant.

## 9. Definitions

**Discouraged work-seeker** is a person who was not employed during the reference period, wanted to work, was available to work/start a business but did not take active steps to find work during the last four weeks, provided that the main reason given for not seeking work was any of the following: no jobs available in the area; unable to find work requiring his/her skills; lost hope of finding any kind of work.

**Economic activities** are those activities that contribute to the production of goods and services in the country. There are two types of economic activities, namely (1) Market production activities (work done for others and usually associated with pay or profit); and (2) Non-market production activities (work done for the benefit of the household, e.g. subsistence farming).

**Employed** persons are those aged 15–64 years who, during the reference week, did any work for at least one hour, or had a job or business but were not at work (i.e. were temporarily absent).

---

<sup>1</sup>Wolter, K.M. 2007. *Introduction to Variance Estimation, 2<sup>nd</sup> Edition*. New York: Springer-Verlag.

**Employment-to-population ratio (labour absorption rate)** is the proportion of the working-age population that is employed.

**Informal employment** identifies persons who are in precarious employment situations, irrespective of whether or not the entity for which they work is in the formal or informal sector. Persons in informal employment, therefore, comprise all persons in the informal sector, employees in the formal sector, and persons working in private households who are not entitled to basic benefits such as pension or medical aid contributions from their employer, and who do not have a written contract of employment.

**Informal sector:** The informal sector has the following two components:

- i) Employees working in establishments that employ fewer than five employees, who do not deduct income tax from their salaries/wages; and
- ii) Employers, own-account workers and persons helping unpaid in their household business who are not registered for either income tax or value-added tax.

The **labour force** comprises all persons who are employed plus all persons who are unemployed.

**Labour force participation rate** is the proportion of the working-age population that is either employed or unemployed.

**Long-term unemployment:** Persons in long-term unemployment are those individuals among the unemployed who were without work and trying to find a job or start a business for one year or more.

**Not economically active:** Persons aged 15–64 years who are neither employed nor unemployed in the reference week.

Persons in **underemployment (time-related)** are employed persons who were willing and available to work additional hours, whose total number of hours actually worked during the reference period were below 35 hours per week.

**Underutilised labour** comprises three groups that are defined as follows: persons who are underemployed, persons who are unemployed, and persons who are discouraged.

**Unemployed** persons according to **Official definition** are those (aged 15–64 years) who:

- a) Were not employed in the reference week; **and**
- b) Actively looked for work or tried to start a business in the four weeks preceding the survey interview; **and**
- c) Were available for work, i.e. would have been able to start work or a business in the reference week; **or**
- d) Had not actively looked for work in the past four weeks, but had a job or business to start at a definite date in the future and were available.

**Unemployed** persons according to **Expanded definition** are those (aged 15–64 years) who:

- a) Official unemployment (searched and available); **and**
- b) Available to work but are/or:
  - Discouraged work-seekers
  - Have other reasons for not searching

**Unemployment rate** is the proportion of the labour force that is unemployed.

The **working-age population** comprises all persons aged 15–64 years.
